Microsoft Agent 365

The control plane for agents

82%

of leaders expect to use agents in the next 12–18 months to meet demand for workforce capacity

75%

of people already use AI at work and 78% of them bring their own AI tools

1.3B

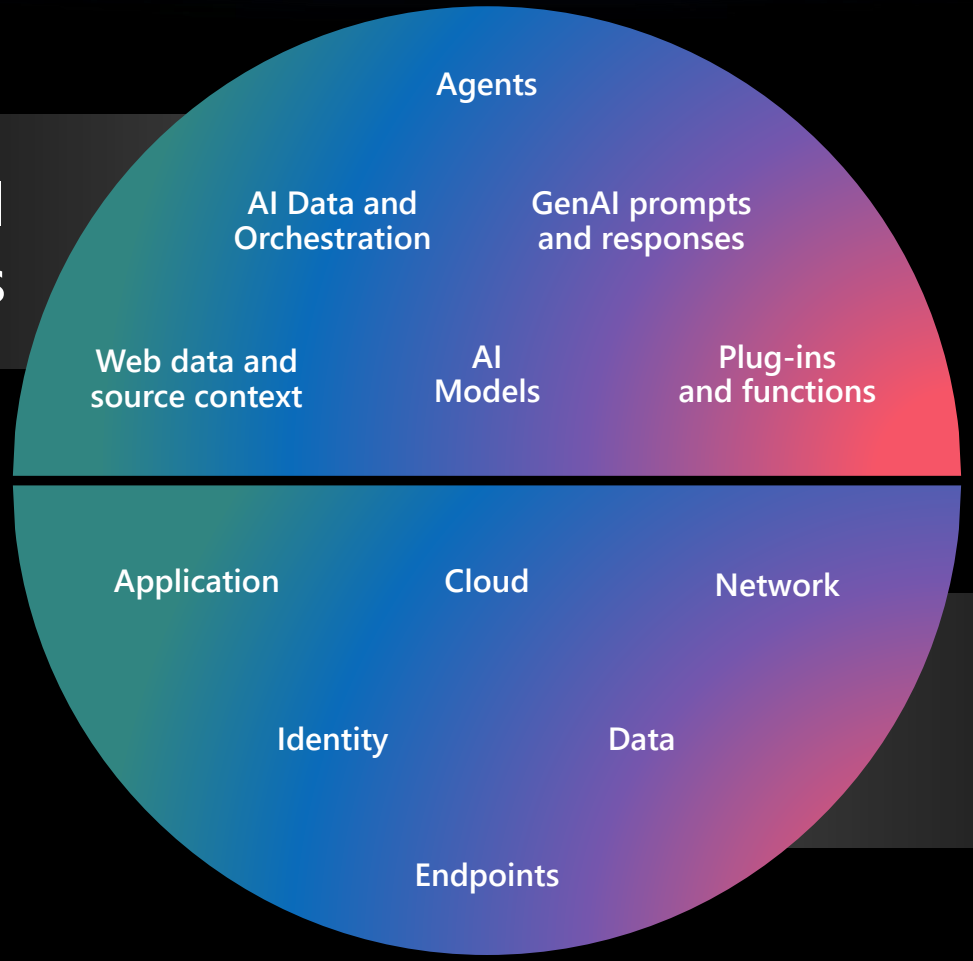

projected number of agents businesses will have by 2028

Source: Microsoft Work Trend Index Survey 2025

Source: IDC Info Snapshot, 1.3 Billion AI Agents by 2028, doc #US53361825, May 2025

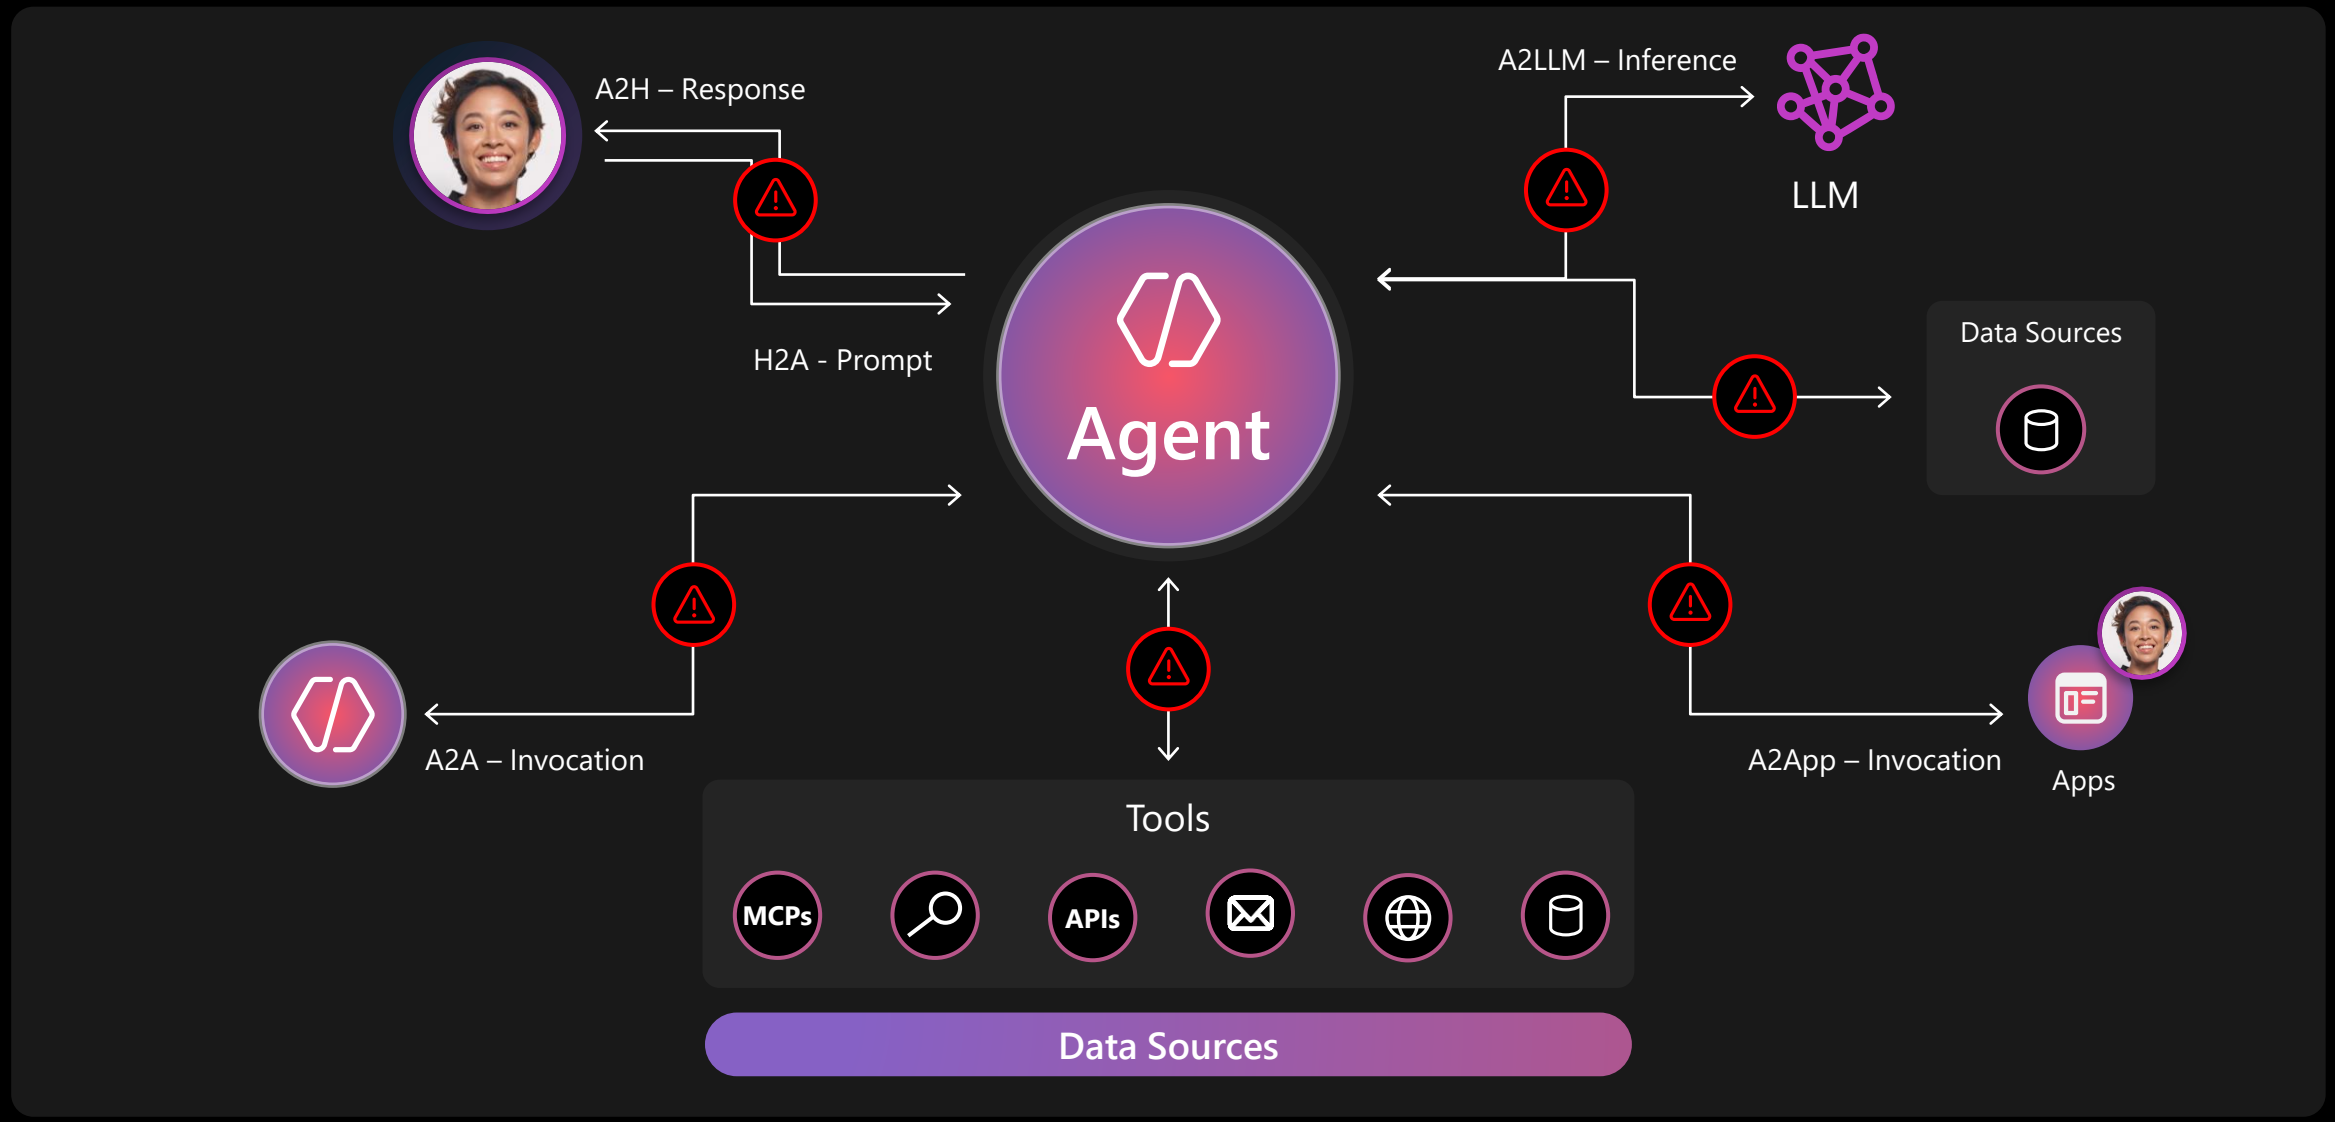

AI creates new attack surfaces

New AI attack surfaces

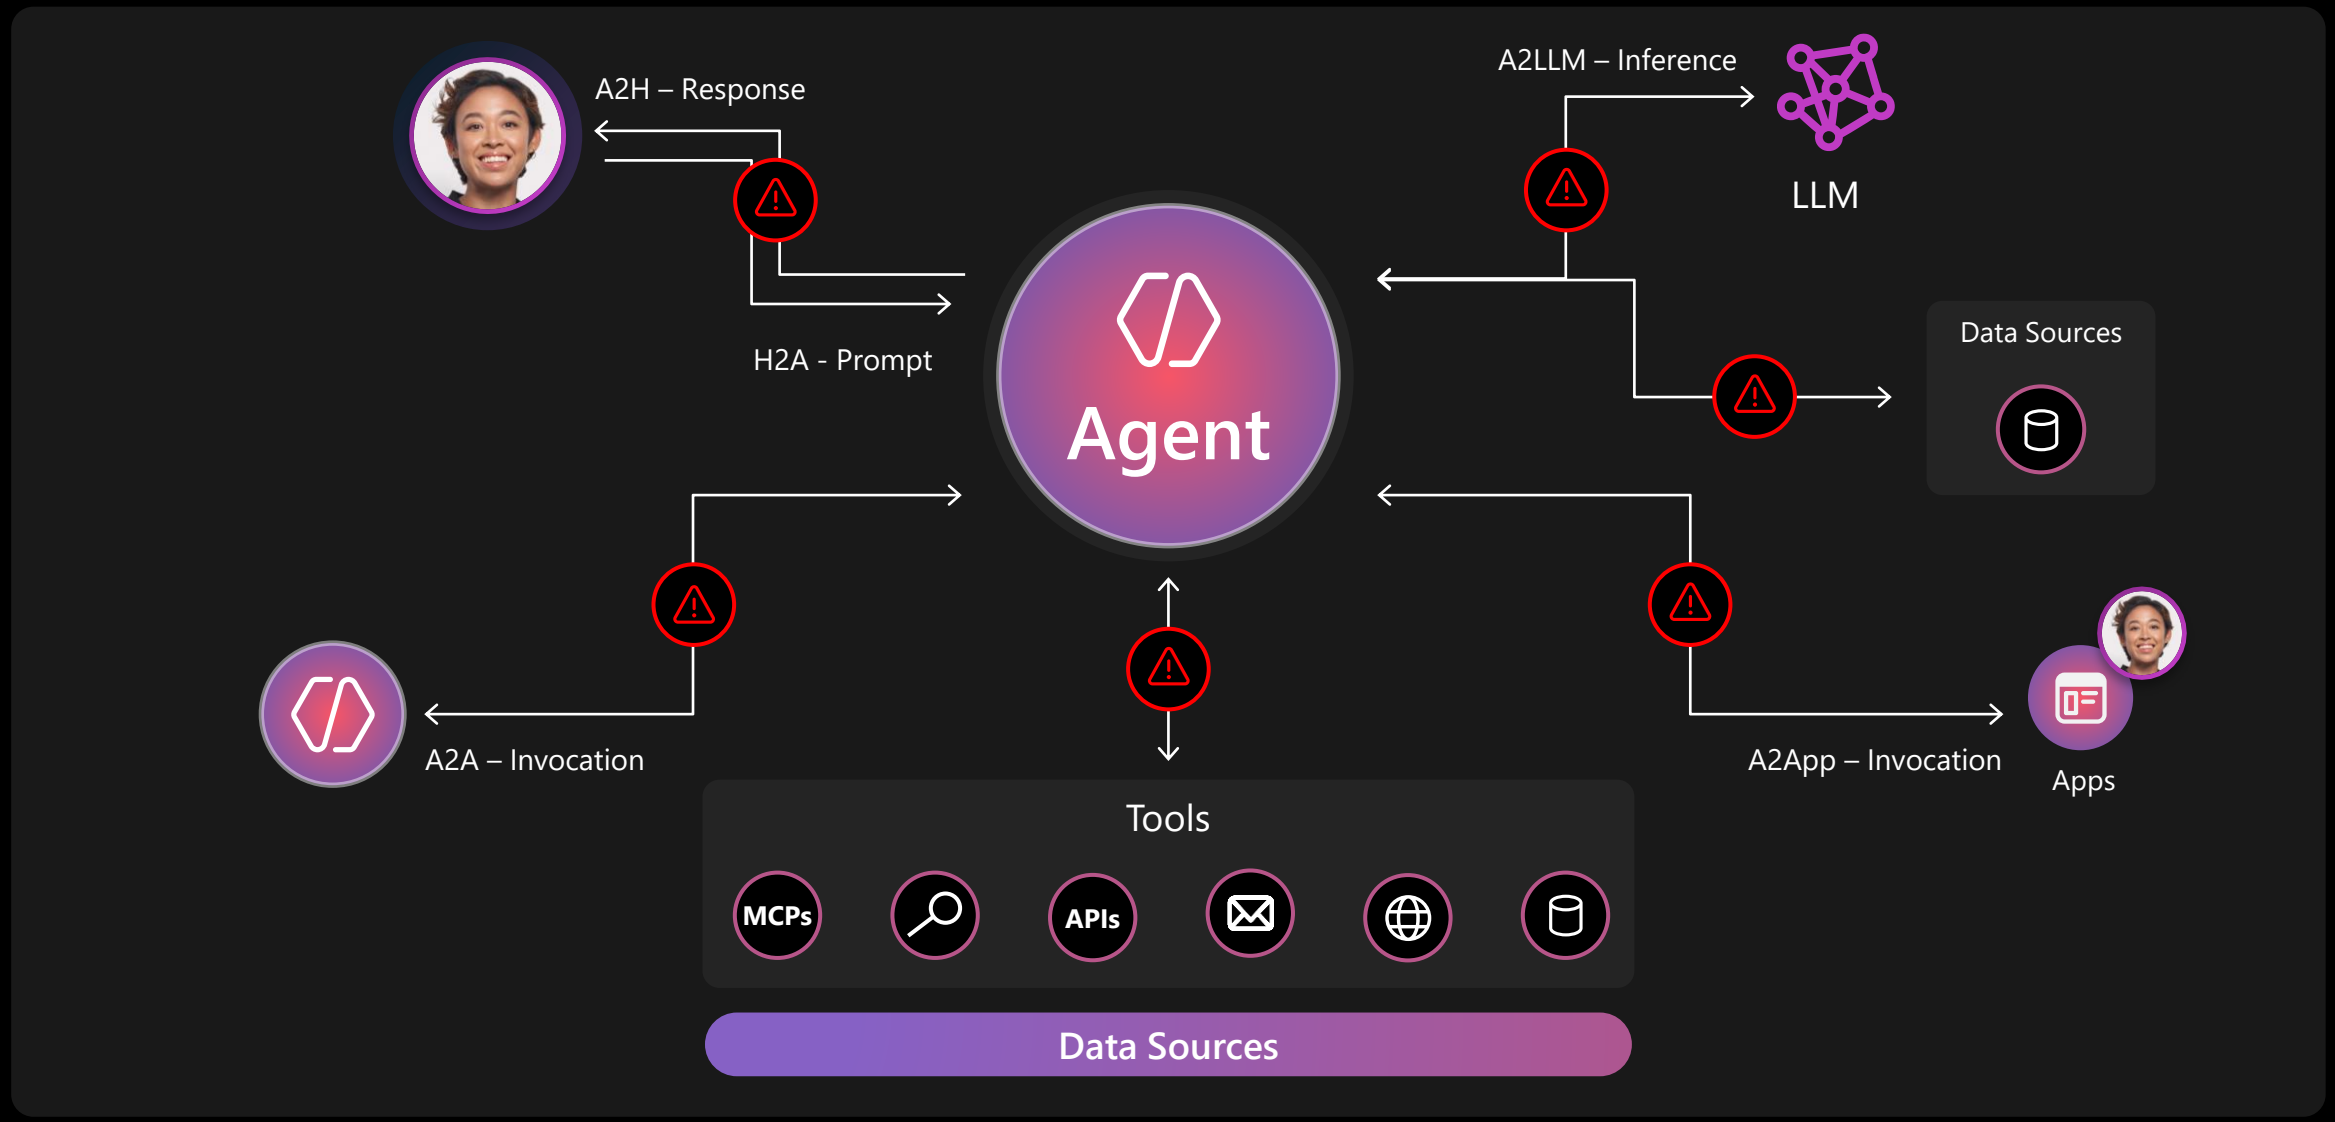

Traditional threat vectors

Agents need same protection as users and more

Included in Microsoft Agent 365

Agent 365 extends Microsoft's familiar tools for users to agents

The same Microsoft's management, security, and productivity solutions are tailor-made for your agentic workforce.

- Microsoft Defender
- Microsoft Entra
- Microsoft Purview
- Microsoft Work IQ
- Microsoft 365
- Microsoft Power Apps
- Microsoft Power BI
- Microsoft 365 Admin Center

Enabling your security teams to tackle agent risks

Identity + network admins need to...

Manage agent sprawl, govern permissions and protect resource access

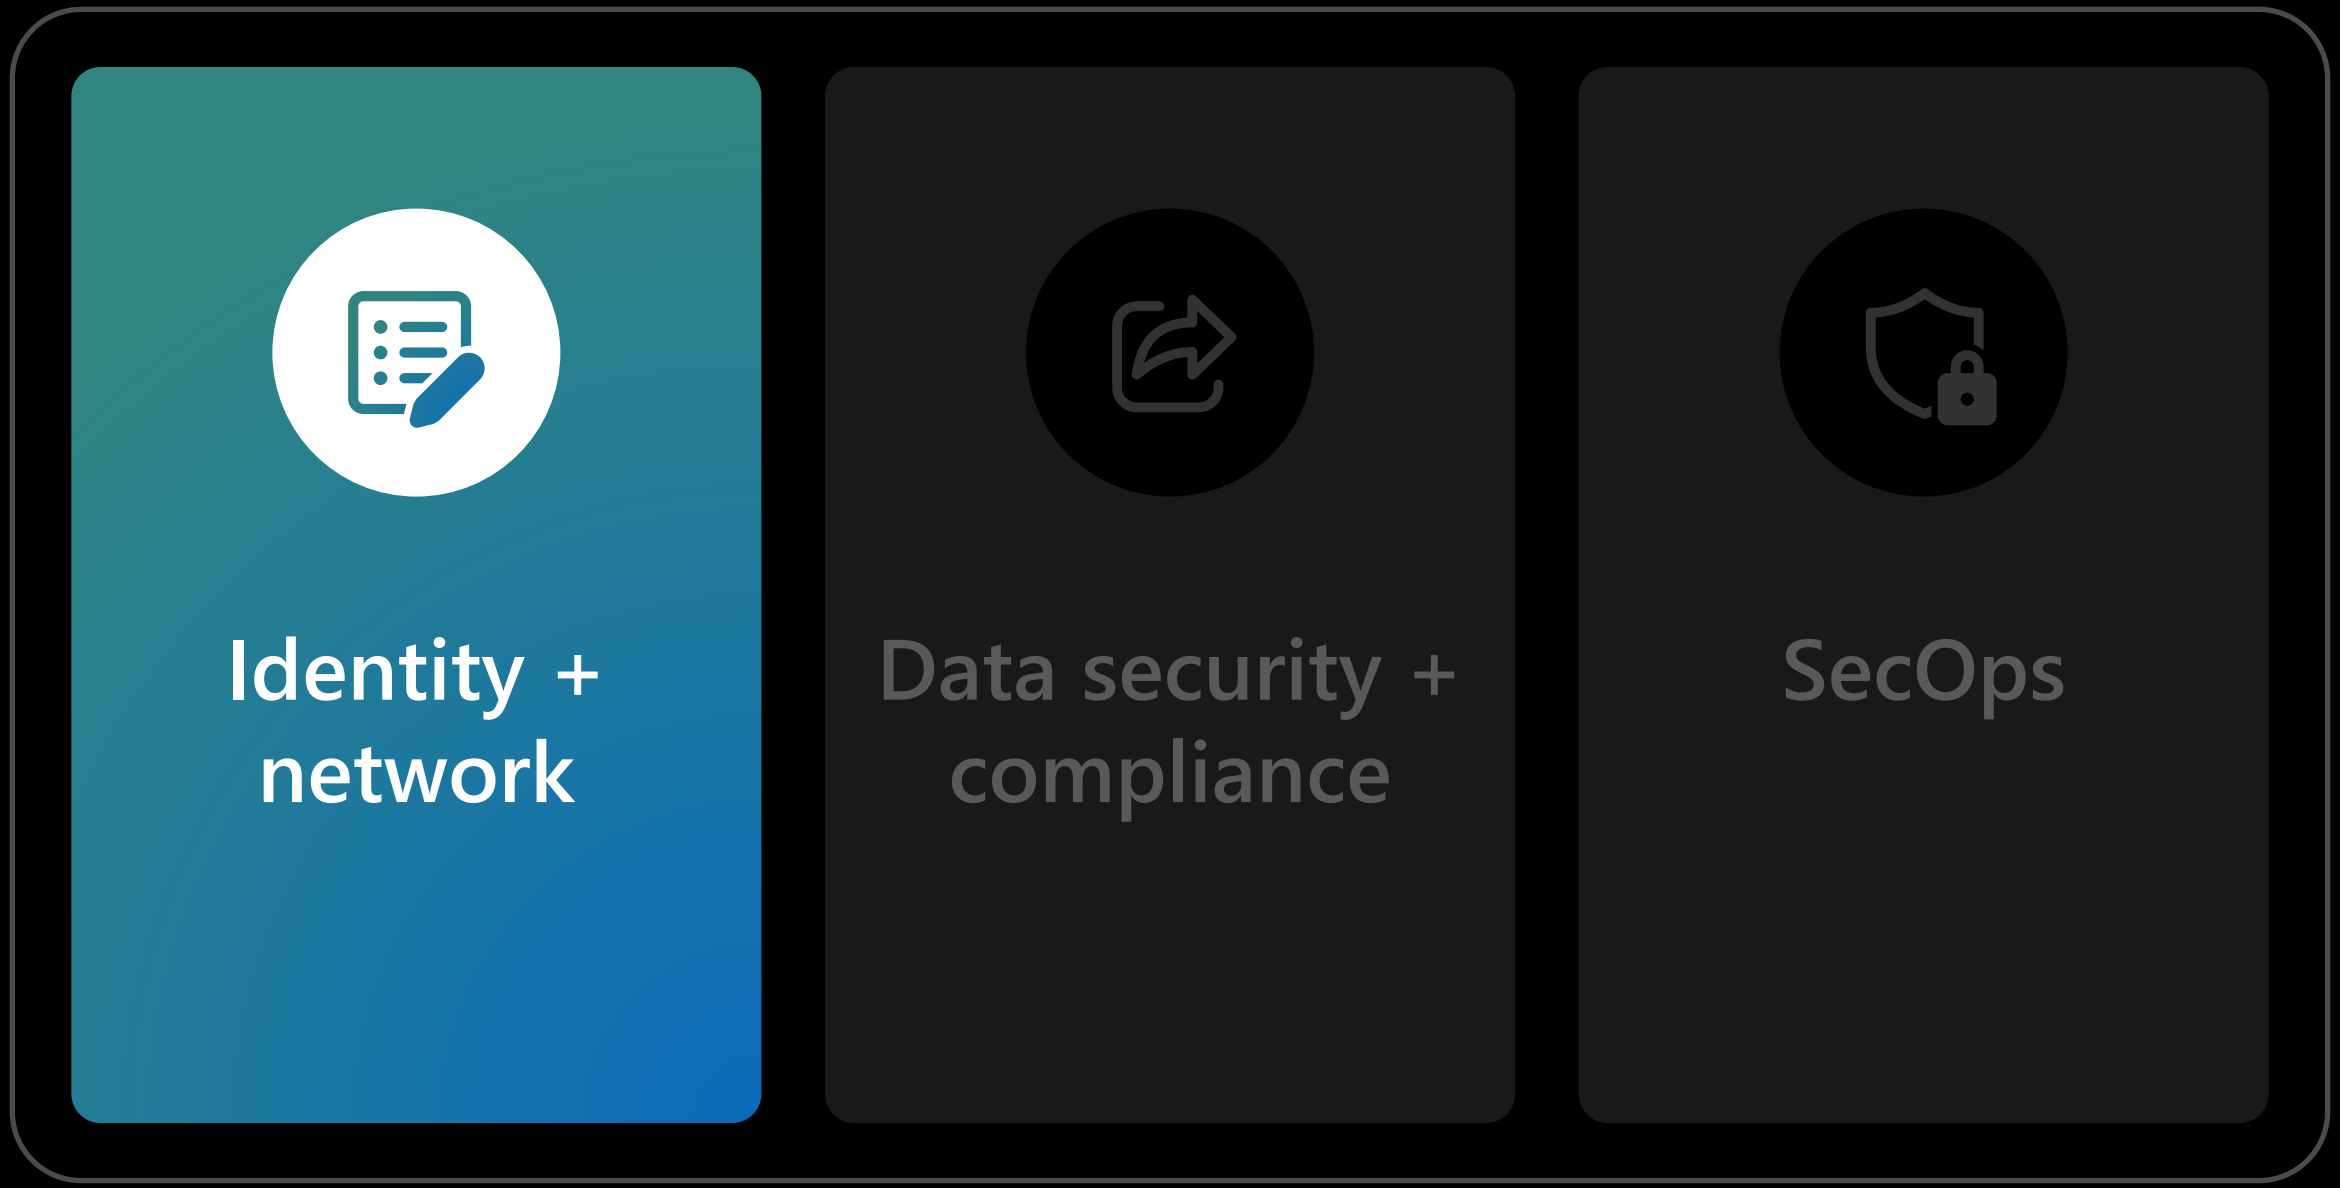

Data security + risk admins need to...

Prevent sensitive data oversharing and ensure data compliance

SecOps admins need to...

Defend against emerging AI threats + vulnerabilities

Identity + network
Data security + compliance
SecOps

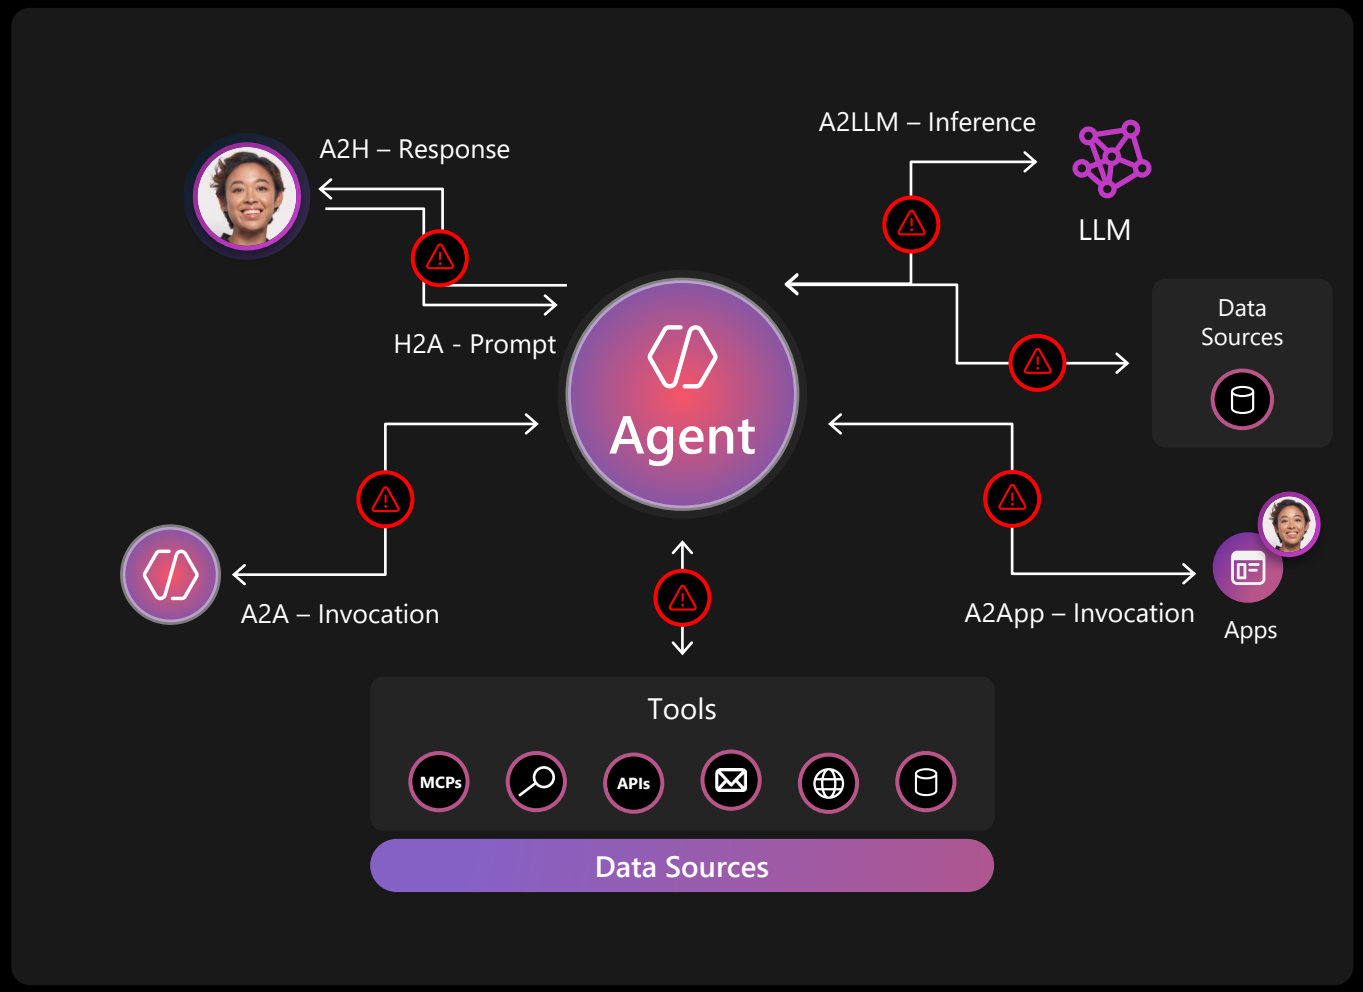

Day in the life | Identity and access teams

Identity and access teams

1. Manage users and groups
2. Govern access rights and lifecycle
3. Enforce Conditional Access policies
4. Prevent risky access to resources
5. Prevent malicious or non-compliant traffic

Extending and adapting identity protections to agents

- Manage agent identities and lifecycle
- Govern who can create and manage agents
- Govern agent permissions
- Protect agent access to apps, tools, systems and other agents
- Protect agents from malicious or non-compliant traffic

What's new

Microsoft Entra Agent ID

Secure access for AI agents

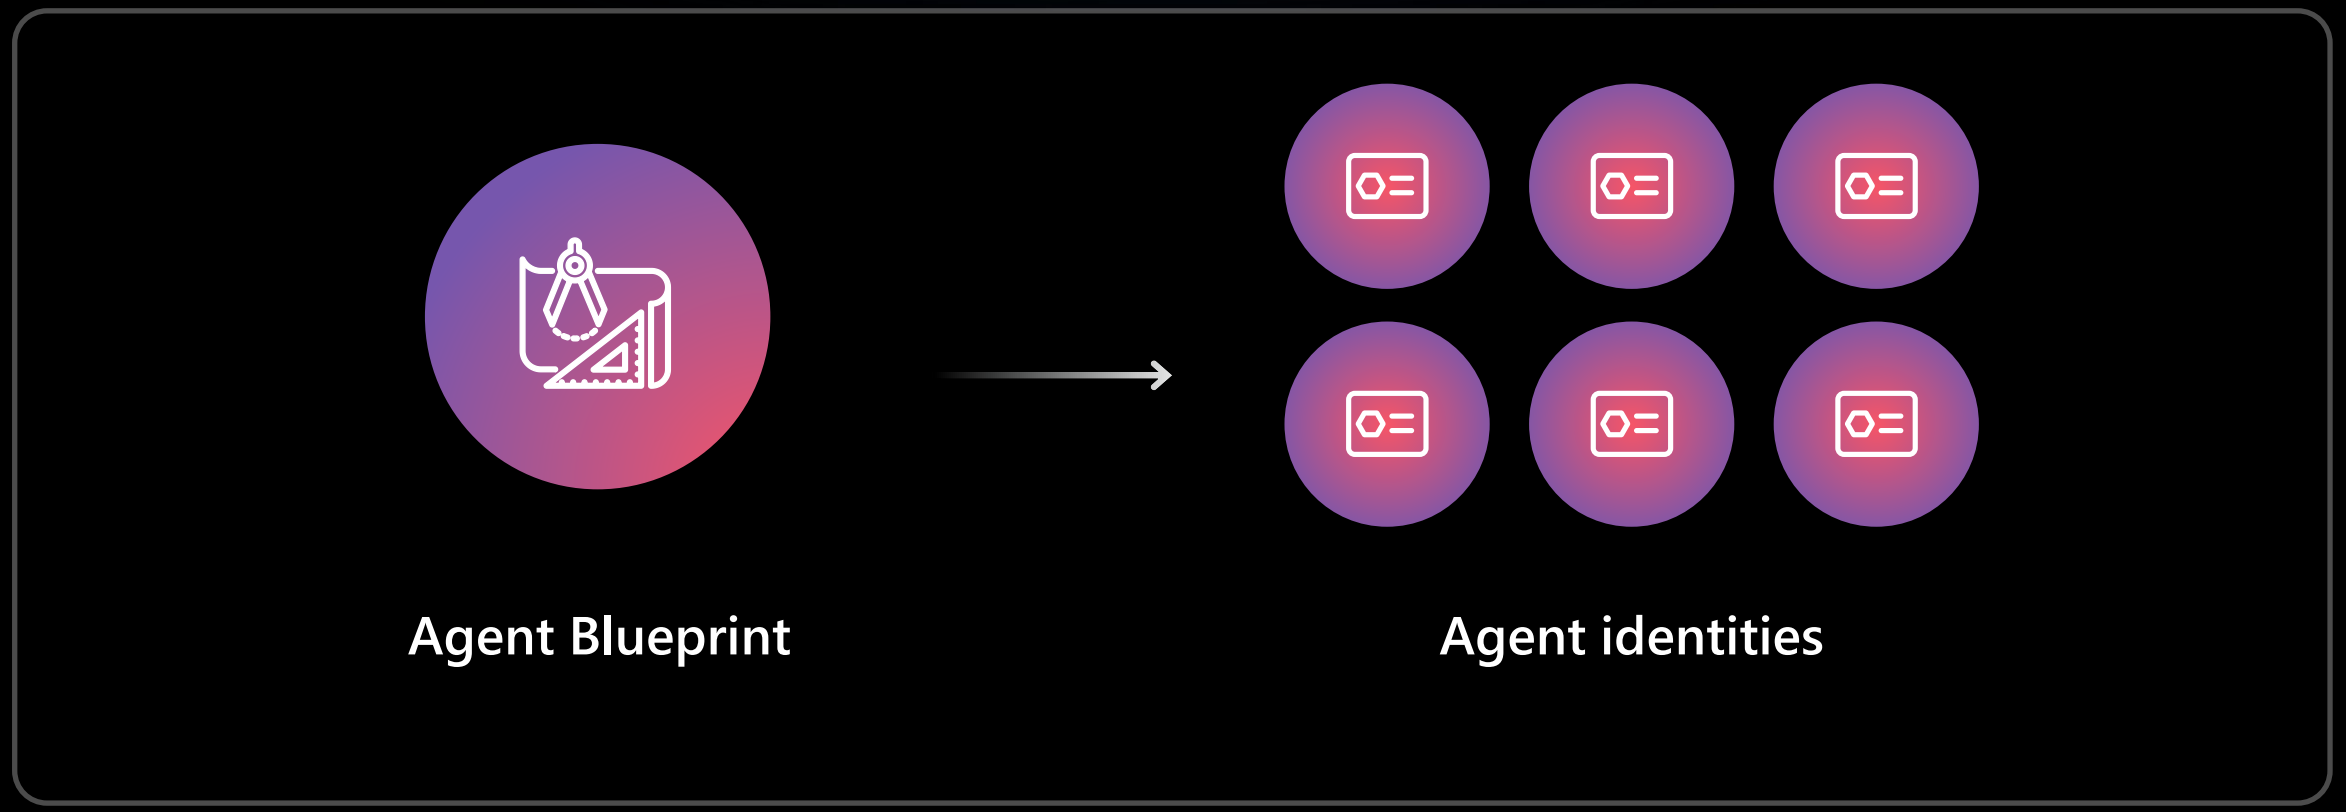

Register and manage agents	Govern agent identities and lifecycle	Protect agent access to resources
• Agent ID • Registry	• Lifecycle management • Sponsors and managers • Access governance	• Conditional access • Identity Protection • Traffic filtering

aka.ms/EntraAgentID

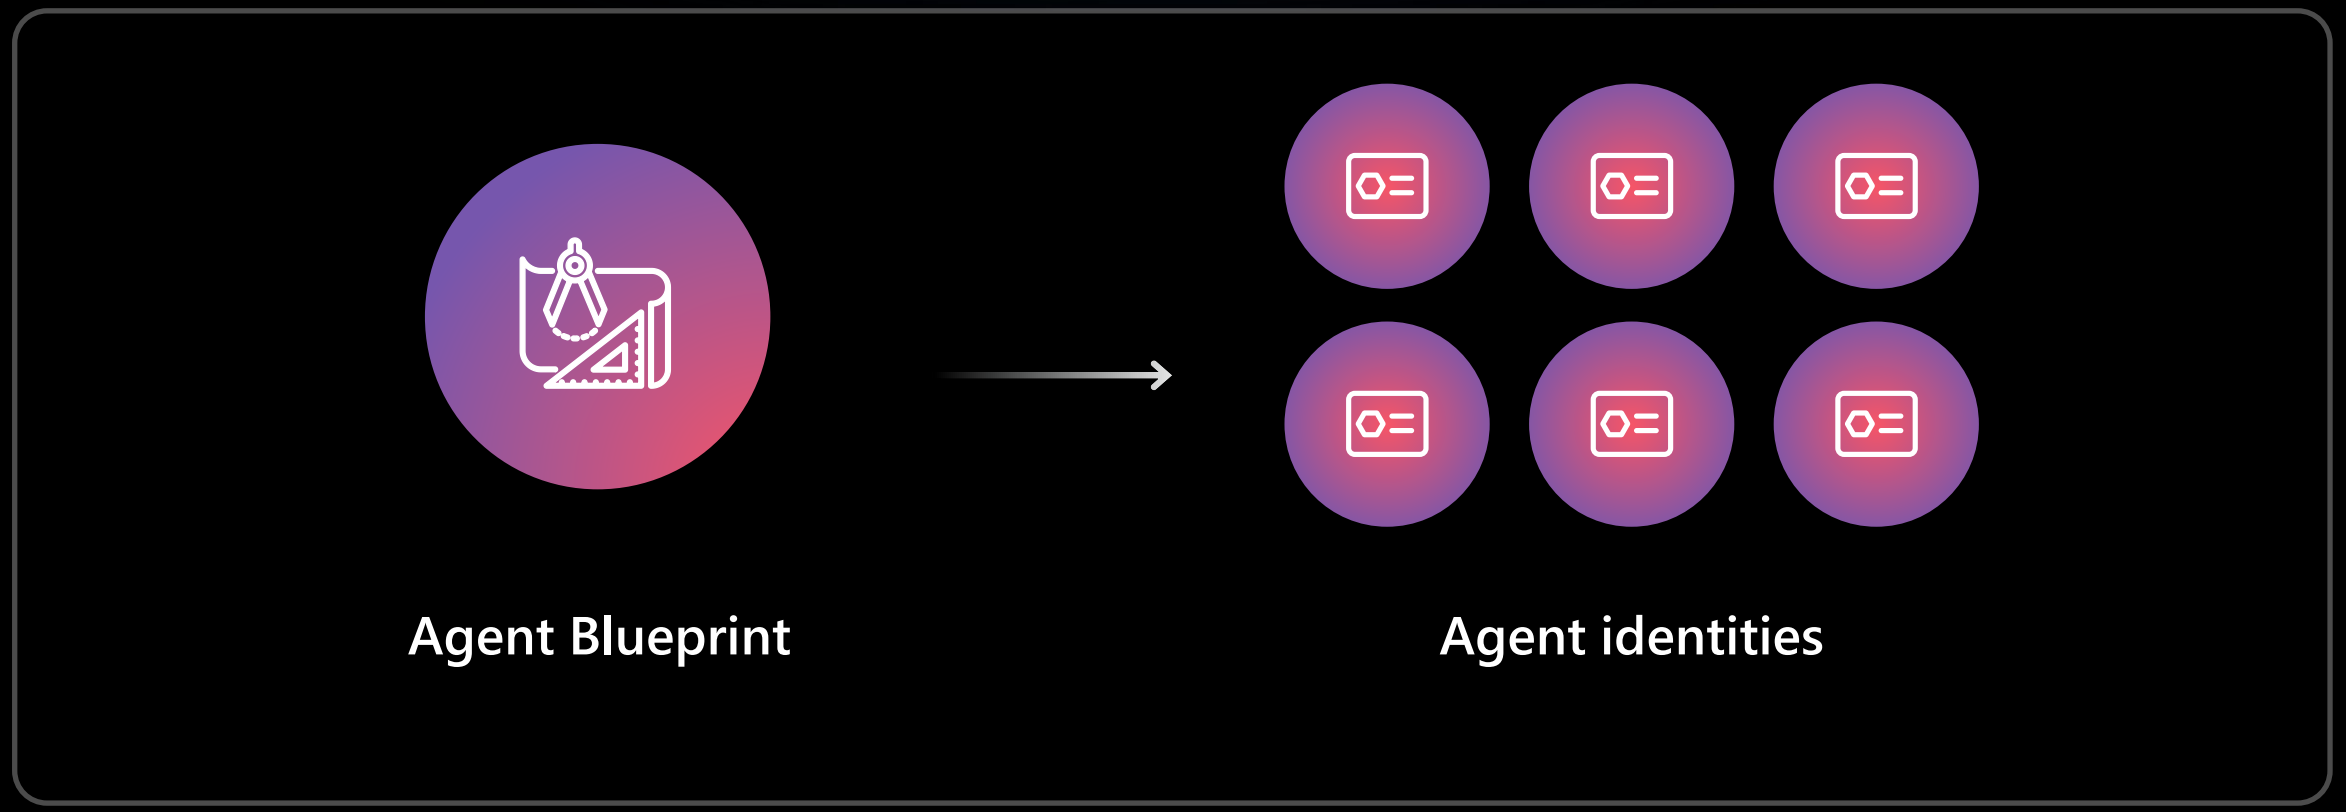

Agent Identity

Agent blueprint

Agent blueprint

Agent registry

Agent-to-Agent discoverability

Allowed and quarantined agents

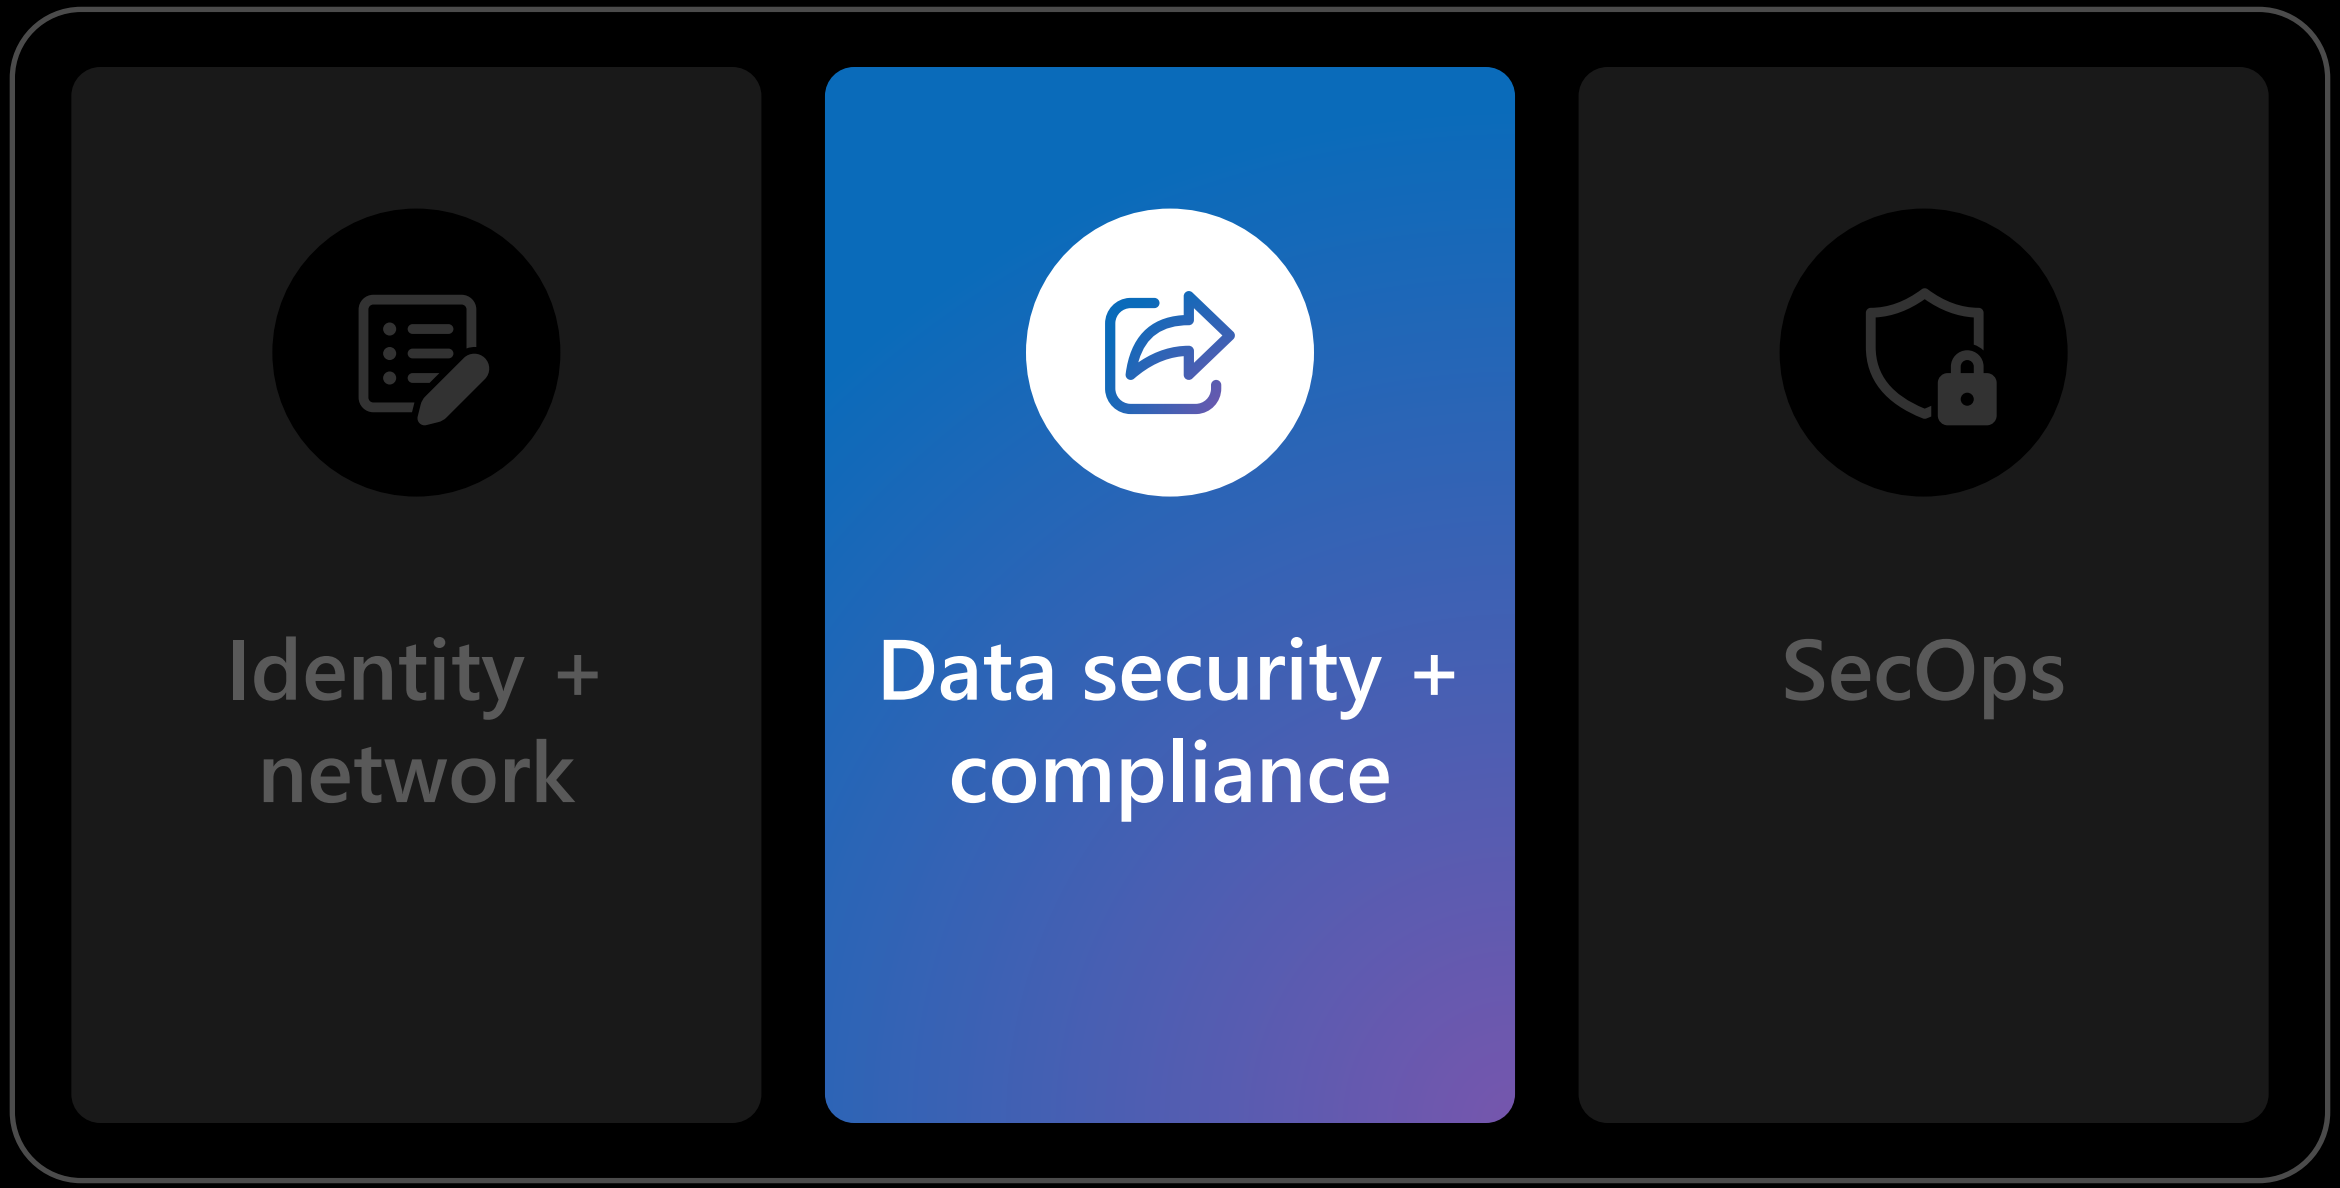

Demo

1. *Register and manage agents with agent ID*
2. *Manage lifecycle of agent sponsors*
3. *Protect agent access to resources with risk-based Conditional Access*
4. *Protect your organization from unsanctioned MCP servers*

Demo recap

Microsoft Entra Agent ID

Register and manage agents	Govern agent identities and lifecycle	Protect agent access to resources
• Agent ID • Agent blueprints	• Agent sponsors • Sponsor lifecycle workflows	• Risk-based Conditional access • MCP server access filtering

Identity + network
Data security + compliance
SecOps

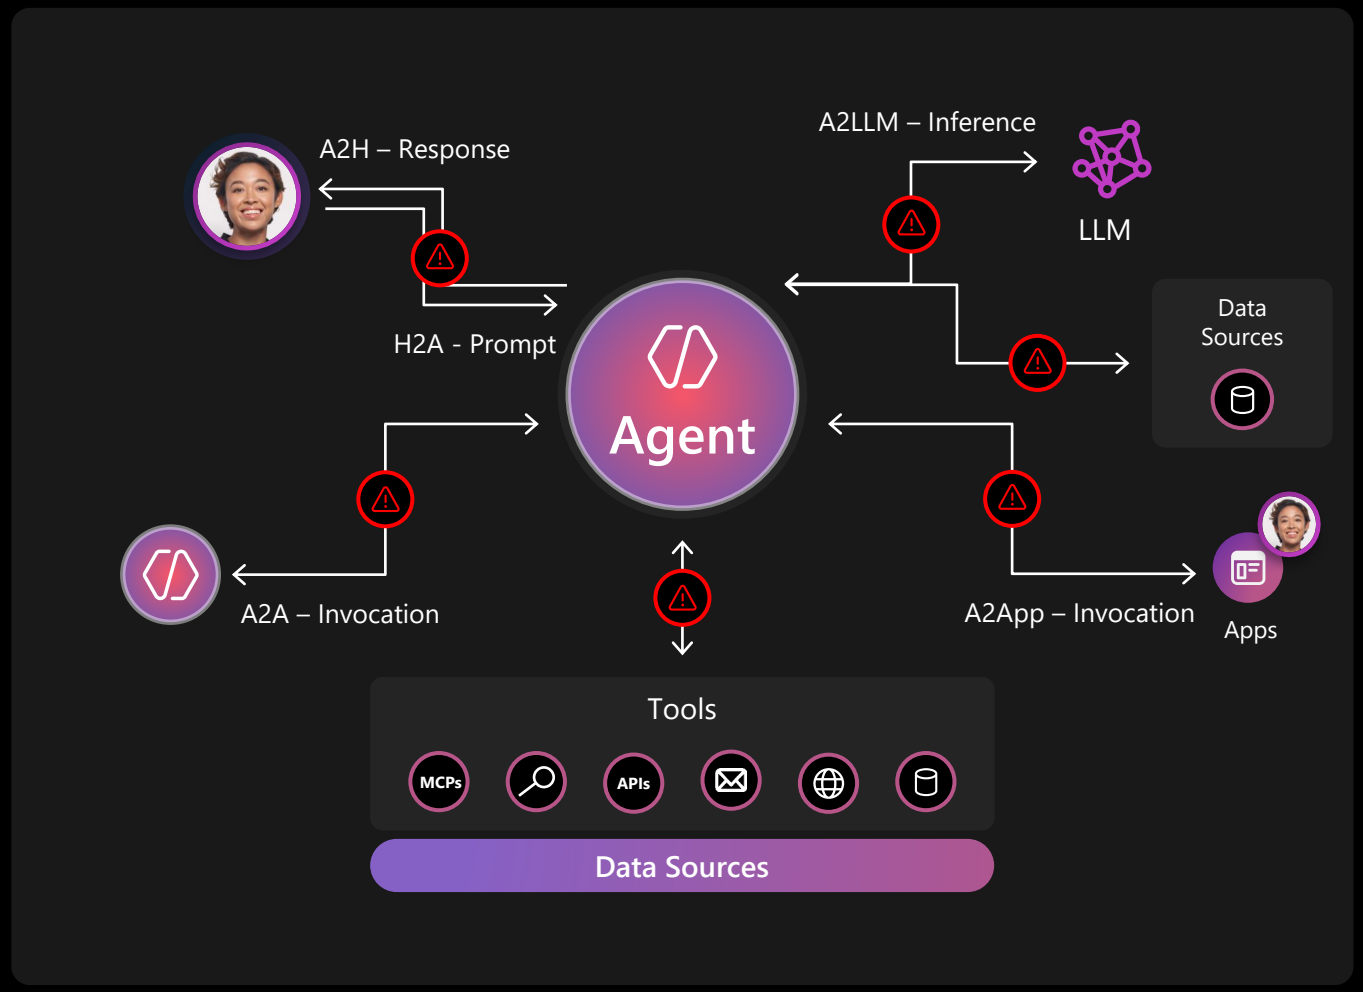

Day in the life | Data security and compliance teams

Data security and compliance teams

1. Investigate and respond to data incidents
2. Classify and protect sensitive data
3. Evaluate and strengthen data security policies, controls and compliance
4. Continuously improve data protection posture
5. Advise on secure data use for AI initiatives

Extending and adapting data security to agents

- Classify and label data in agent workflows
- Govern what data each agent can access
- Enforce DLP and policy controls on agents
- Prevent agent-driven oversharing or data exposure
- Detect and block risky agent data flows

What's new

Microsoft Purview

Data security and compliance for AI agents

Observe agent risk

- AI Observability in DSPM
- Insider Risk Management for Agents

Protect sensitive data

- Purview protections for agent interactions
- Support for Agent ID

Maintain compliance

- Compliance controls extended to agents

aka.ms/PurviewforAgents

Demo

Here's what I'm going to show you how Purview can help you:

1. *Protect sensitive data*
2. *Observe agent risk*
3. *Maintain compliance*

Identity + network

Data security + compliance

SecOps

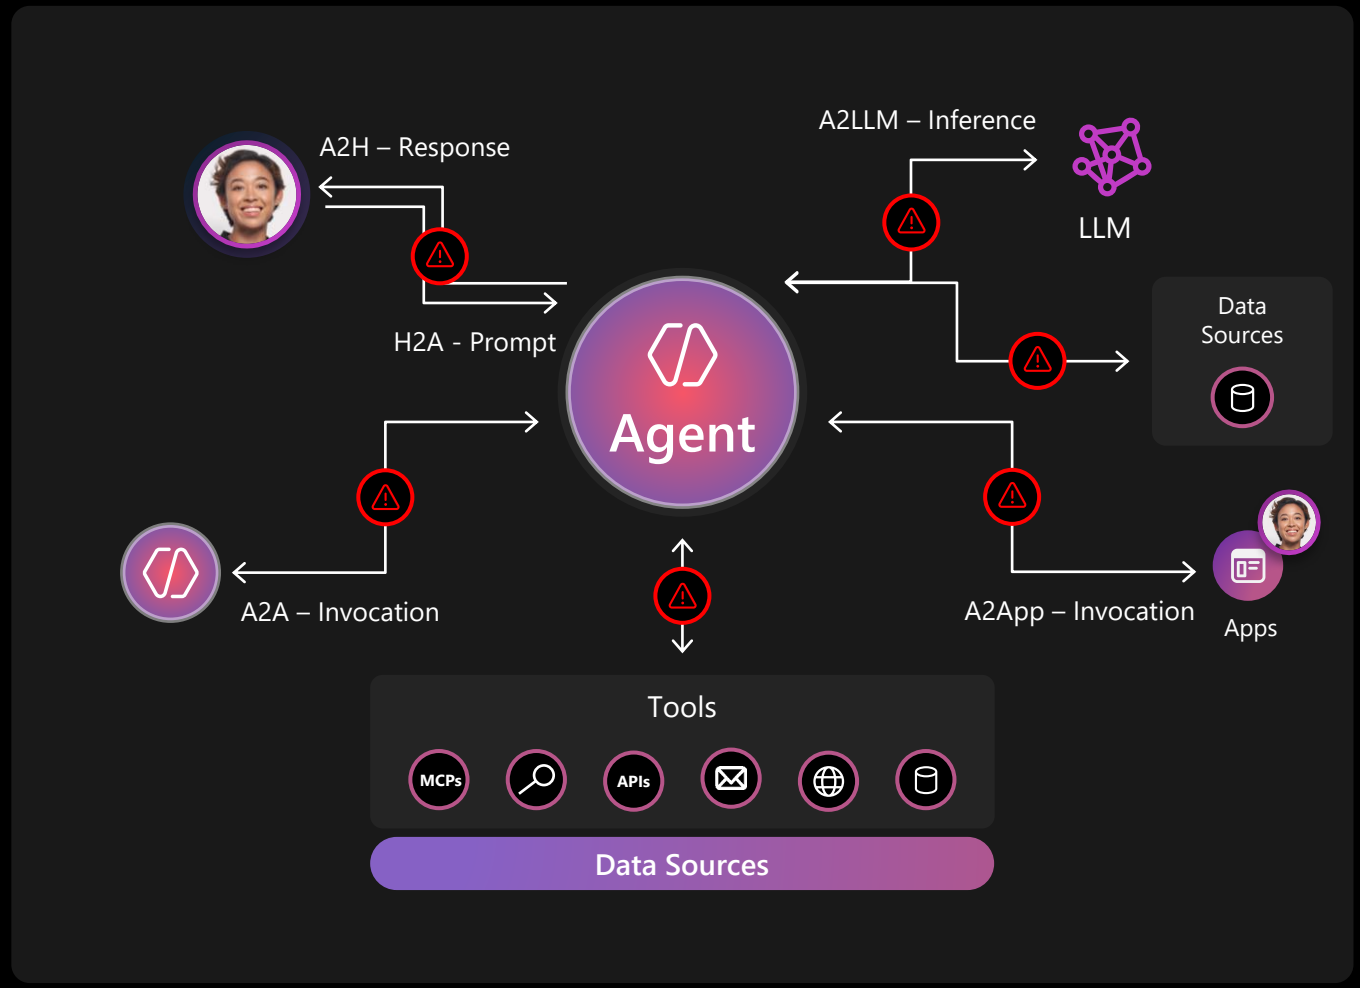

Day in the life | SOC Analyst

SOC Analyst

1. Triage and investigate security alerts
2. Respond to incidents
3. Hunt for threats in your environment
4. Evaluate your security posture
5. Manage attack paths and vulnerabilities

Extending and adapting security operations to agents

- Block prompt injection in real-time
- Manage agent security posture
- Detect emerging threats
- Hunt across agent data

What's new

Microsoft Defender

Security posture and threat protection for AI agents

Prevent threats

- Runtime protection
- Security posture management
- Attack path analysis

Detect threats

- OOTB threat detections
- Ability to create custom detections

Investigate & respond

- Agent inventory
- Incident investigation
- Threat hunting

aka.ms/Defender-S4AI-Ignite-2025

Threat Protection for A365 SDK partner platforms

Kasisto

Genspark

Threat detection + Threat hunting

Demo

1. Investigate incidents that involve agents

2. Understand their security posture

3. Assess attack paths and remediate vulnerabilities

Purpose-built capabilities for the agentic enterprise
