System Compatibility Test

What is the System Compatibility Test?

The System Compatibility Test is a short pre-event check designed to verify that your system, browser, network, and organizational account can successfully access the CloudLabs portal and launch the hands-on lab environment. It allows you to validate that all required components work correctly before participating in the scheduled lab session.

Here is the - System Compatibility Test Guide for Trainer and Attendee

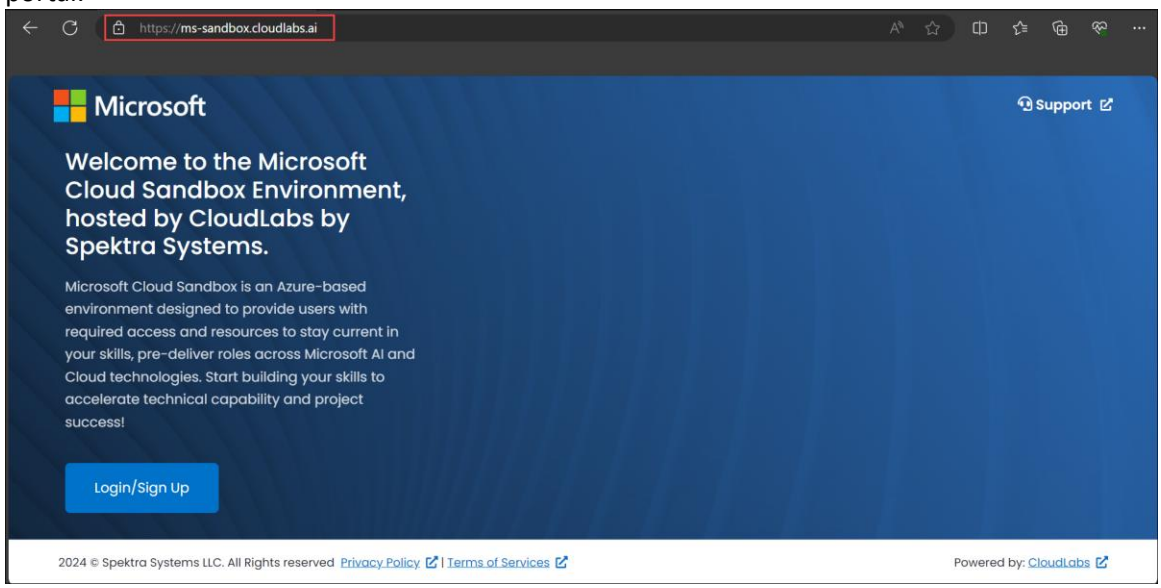

Completing this system compatibility test ensures your system is fully ready to access the hands-on labs smoothly during the scheduled event and helps avoid delays or technical interruptions on the event day.

On the event day, please use the same email that was used for the System Compatibility Test.

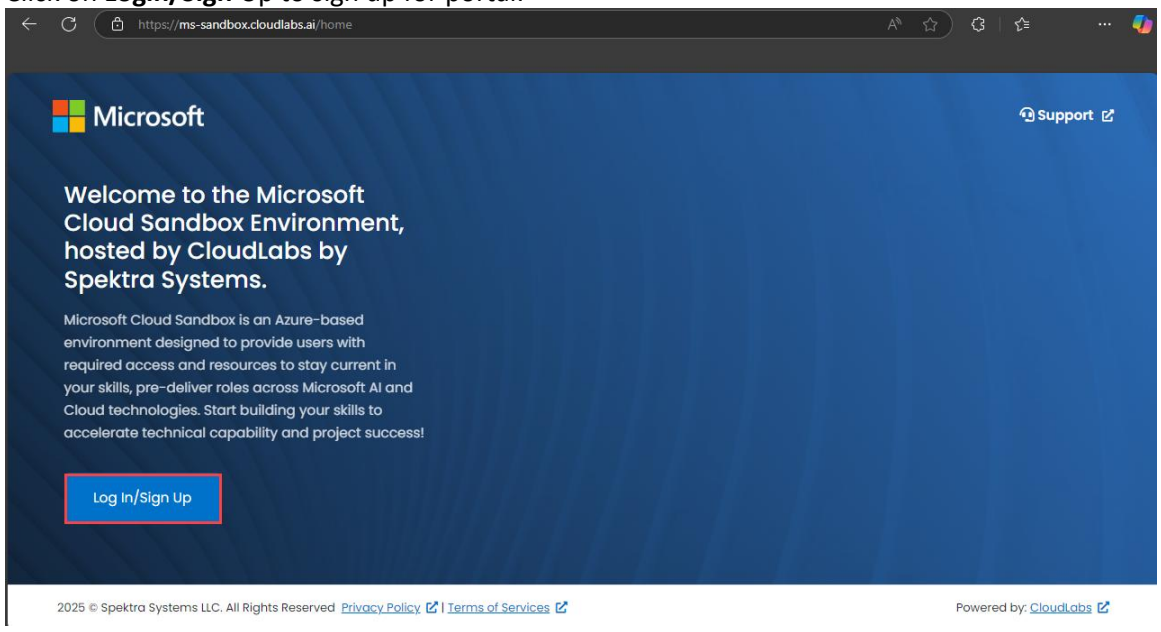

How to Access and Launch Your Course via CloudLabs portal

The guide below provides information on how to sign up, redeem your voucher, and launch your Accelerate Agentic AI for Frontier with Capstone lab using the CloudLabs portal.

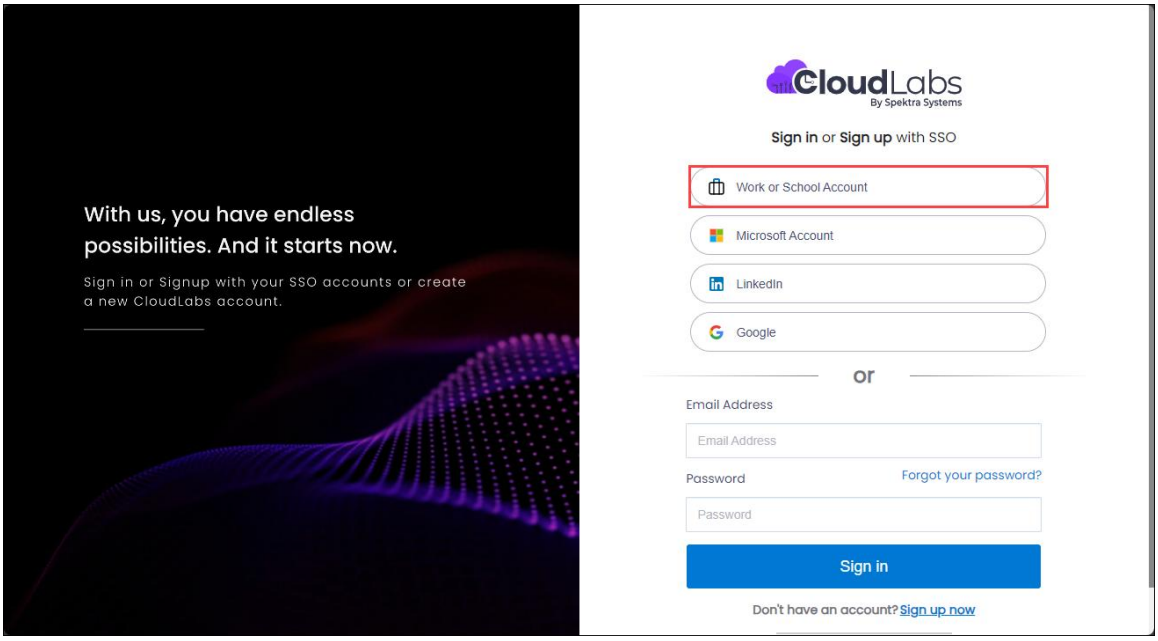

1. Navigate to https://ms-sandbox.cloudlabs.ai/ to access the CloudLabs portal using the On24 portal.

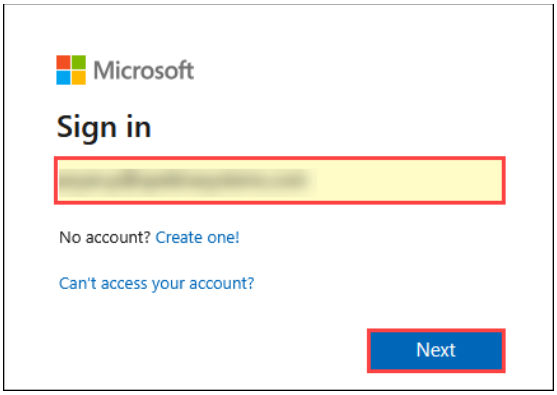

2. Click on **Login/Sign** Up to sign up for portal.

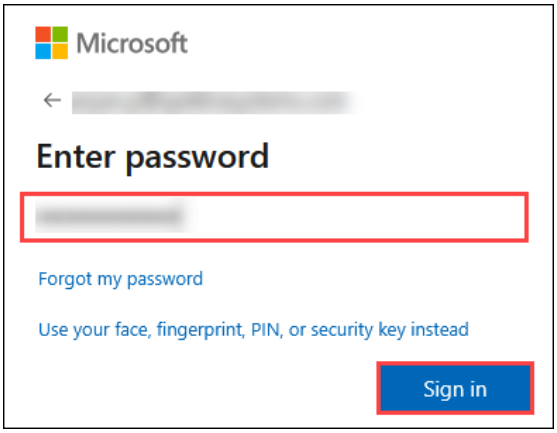

3. Select Sign in with your **Work or School account.**

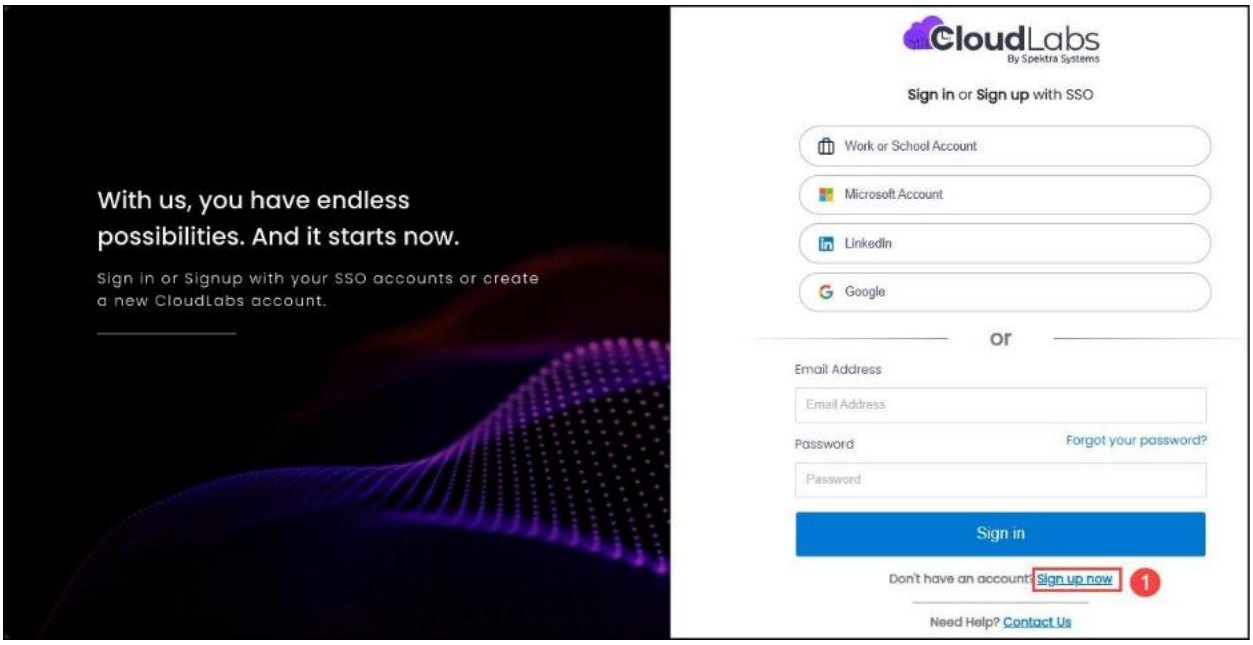

4. Enter your **credentials.** Provide your valid **work or school email address** and **password**. If you encounter any issues with signing in using your Work or School Account, you can try using alternative signing options that are available.

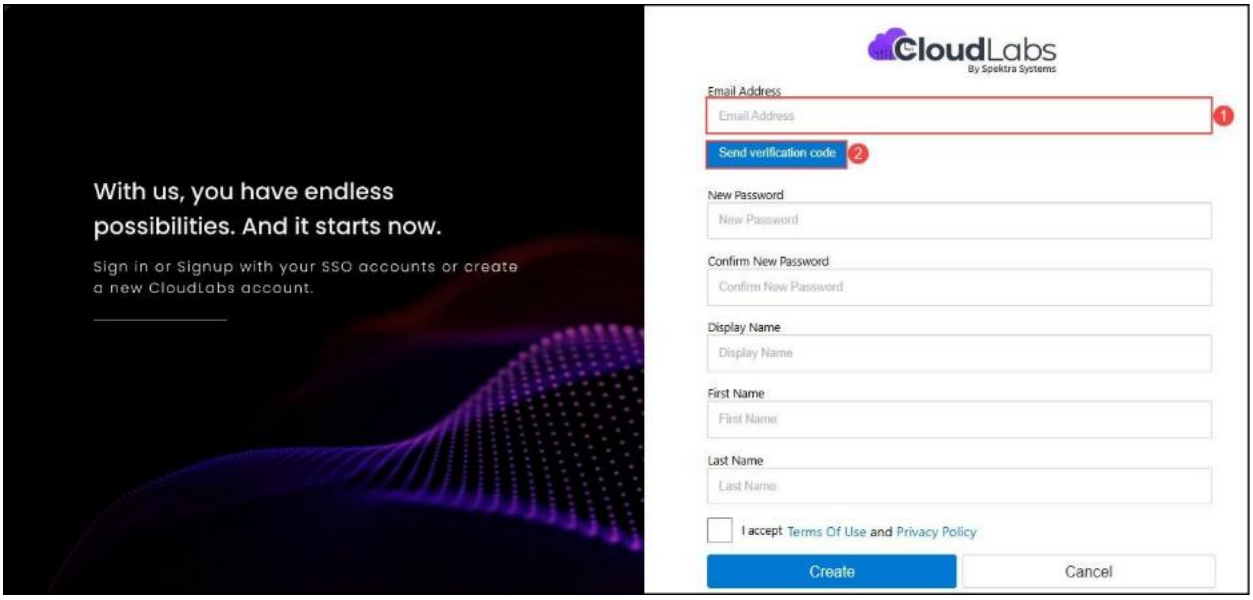

5. If you are still unable to sign in or complete the sign-up process, please click on the **Sign-up now** button to sign up for the portal with your work account.

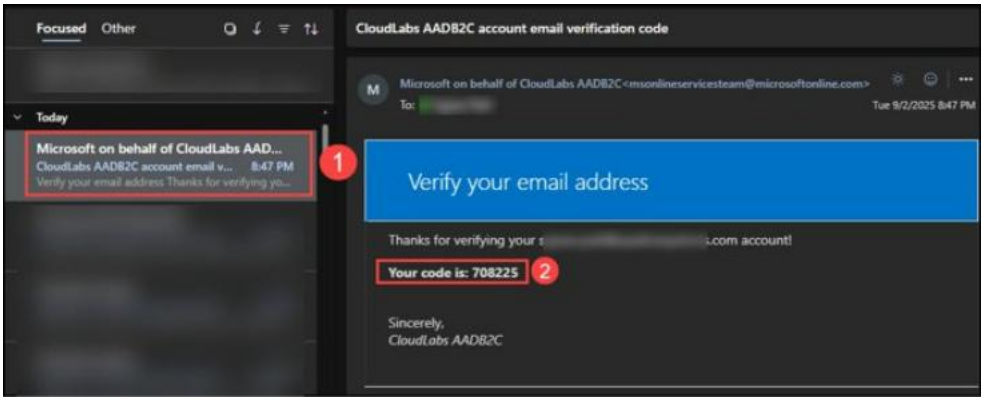

6. Enter your email address in the **Email Address** field and click **Send Verification Code** to receive a verification code in your email.

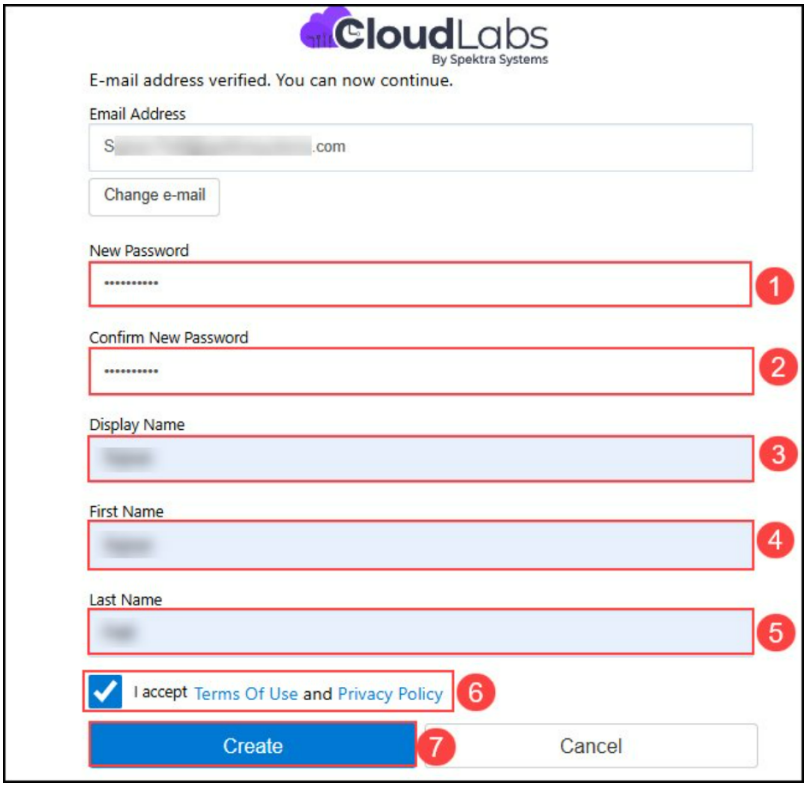

7. Enter the verification code received in your email, and then click **Verify Code**.

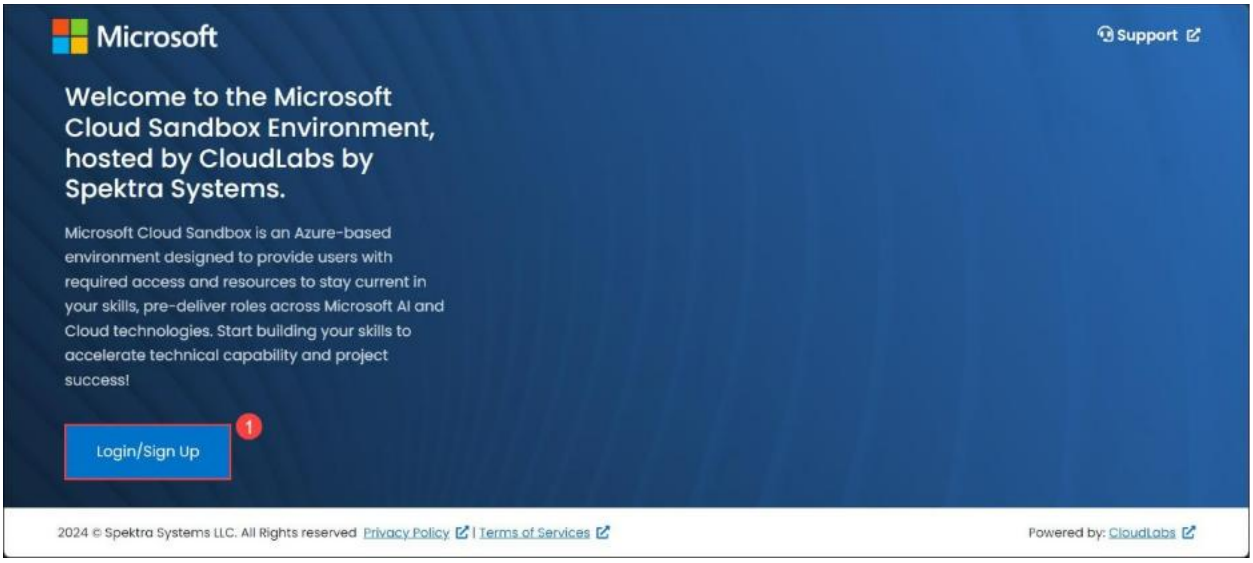

8. Once verified, enter the required details and click **Create** to complete the sign-up process.

   Note: You may create any password of your choice; it does not need to match your work account password.

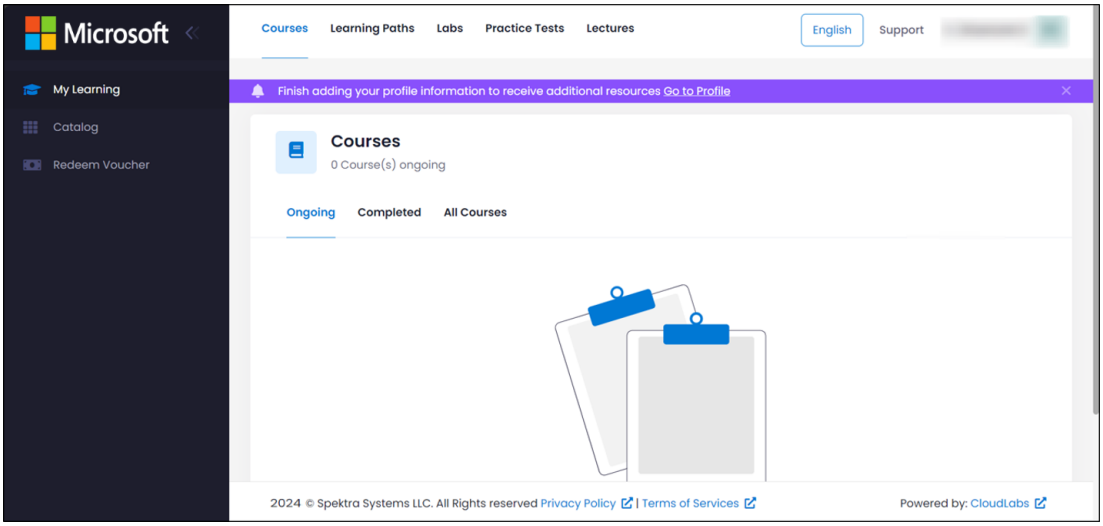

9. As the next step, click **Login / Sign Up** to access the CloudLabs portal at https://ms-sandbox.cloudlabs.ai/

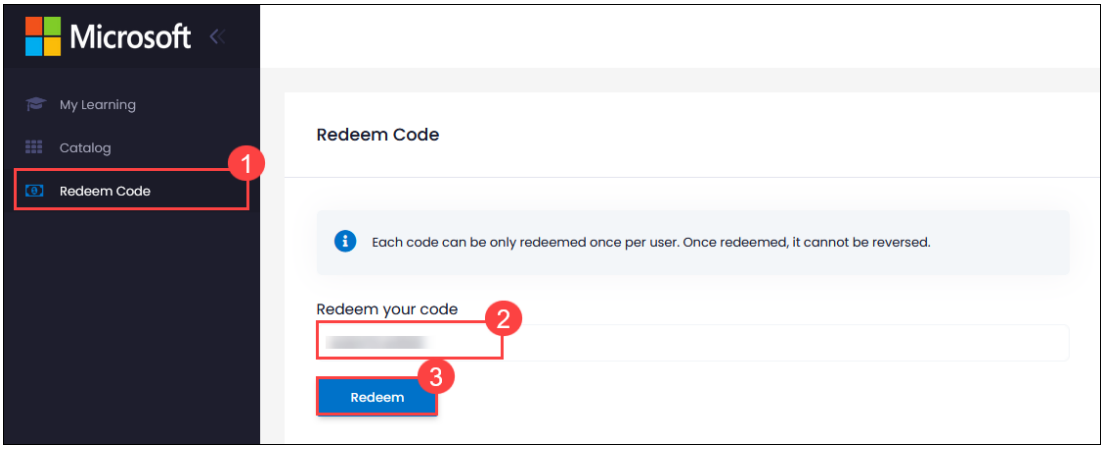

10. Enter the **email address** and **password**. Click **Sign in** to complete the login.

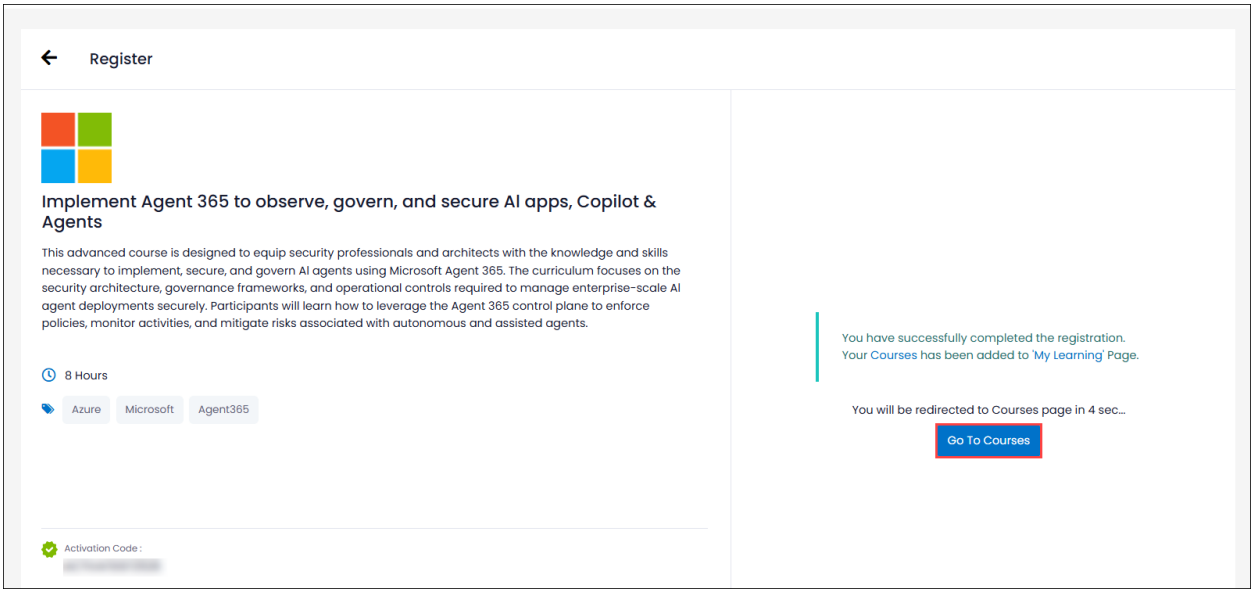

11. You have successfully logged in to the CloudLabs portal.

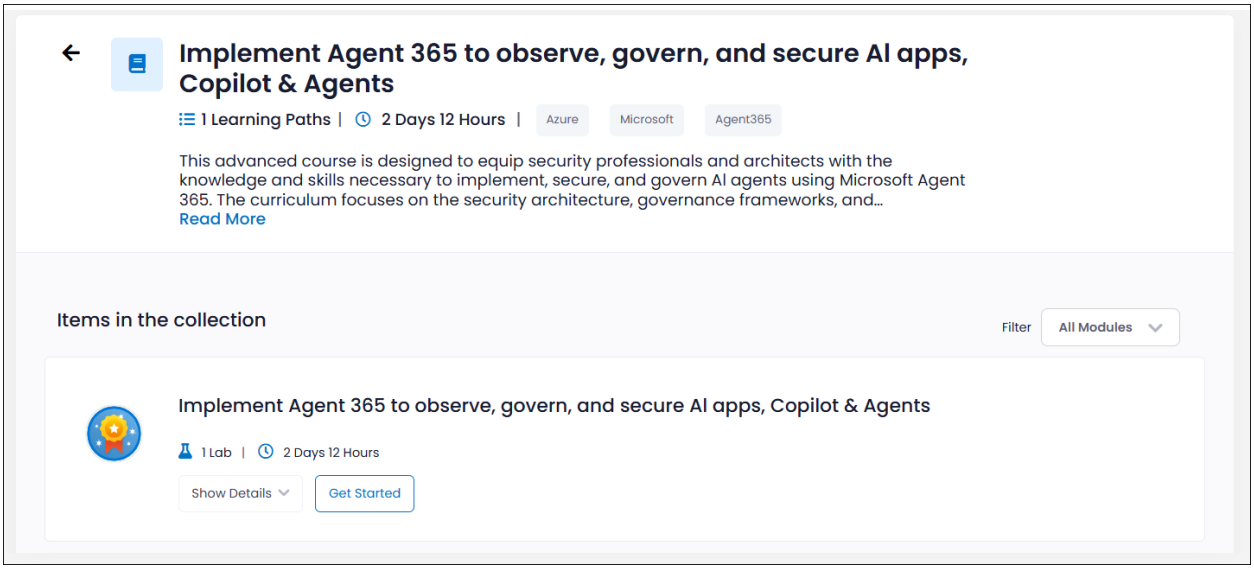

12. Navigate to the **Redeem Code** (1) section from the main dashboard. Enter the **voucher code** (2) in the input field and click on **Redeem** (3).

13. Once the voucher is redeemed successfully, a confirmation message will be displayed, and you will be automatically redirected to the Courses page. If you are not redirected automatically, please click on the **Go to Courses** button manually.

14. Upon successful login, you will be redirected to a curated course created specifically for this event.

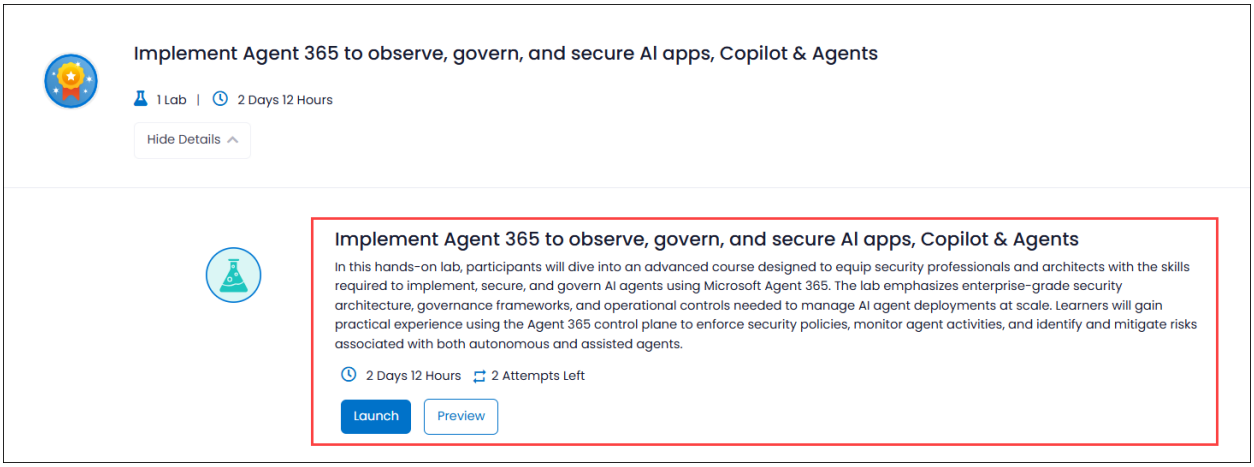

15. On the course page, you will find the **total duration** (1) required to complete the course, along with a brief **description** (2) outlining what the course covers. Please take a moment to review the course details before getting started.

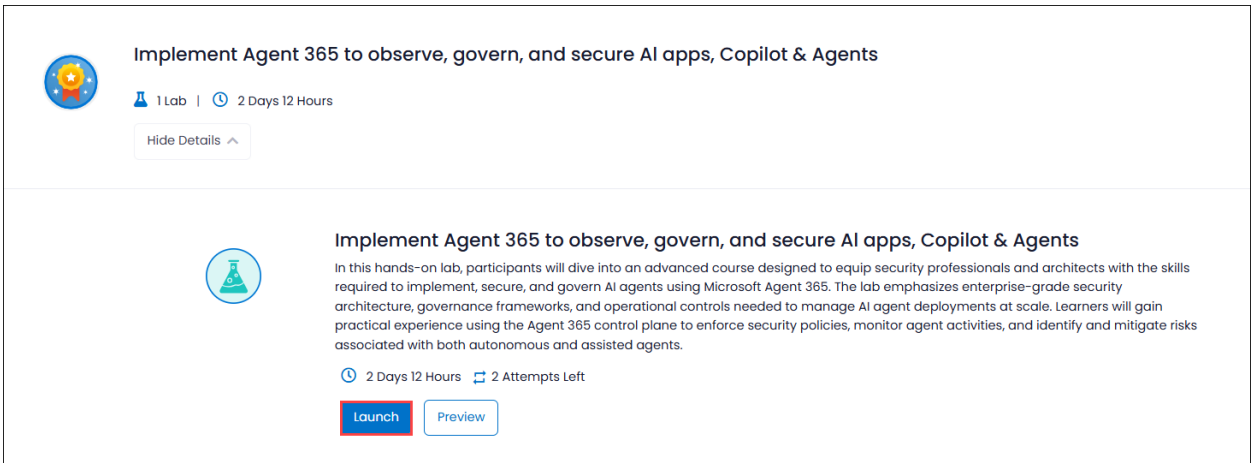

16. Click on the **Get Started** button to expand the course content.

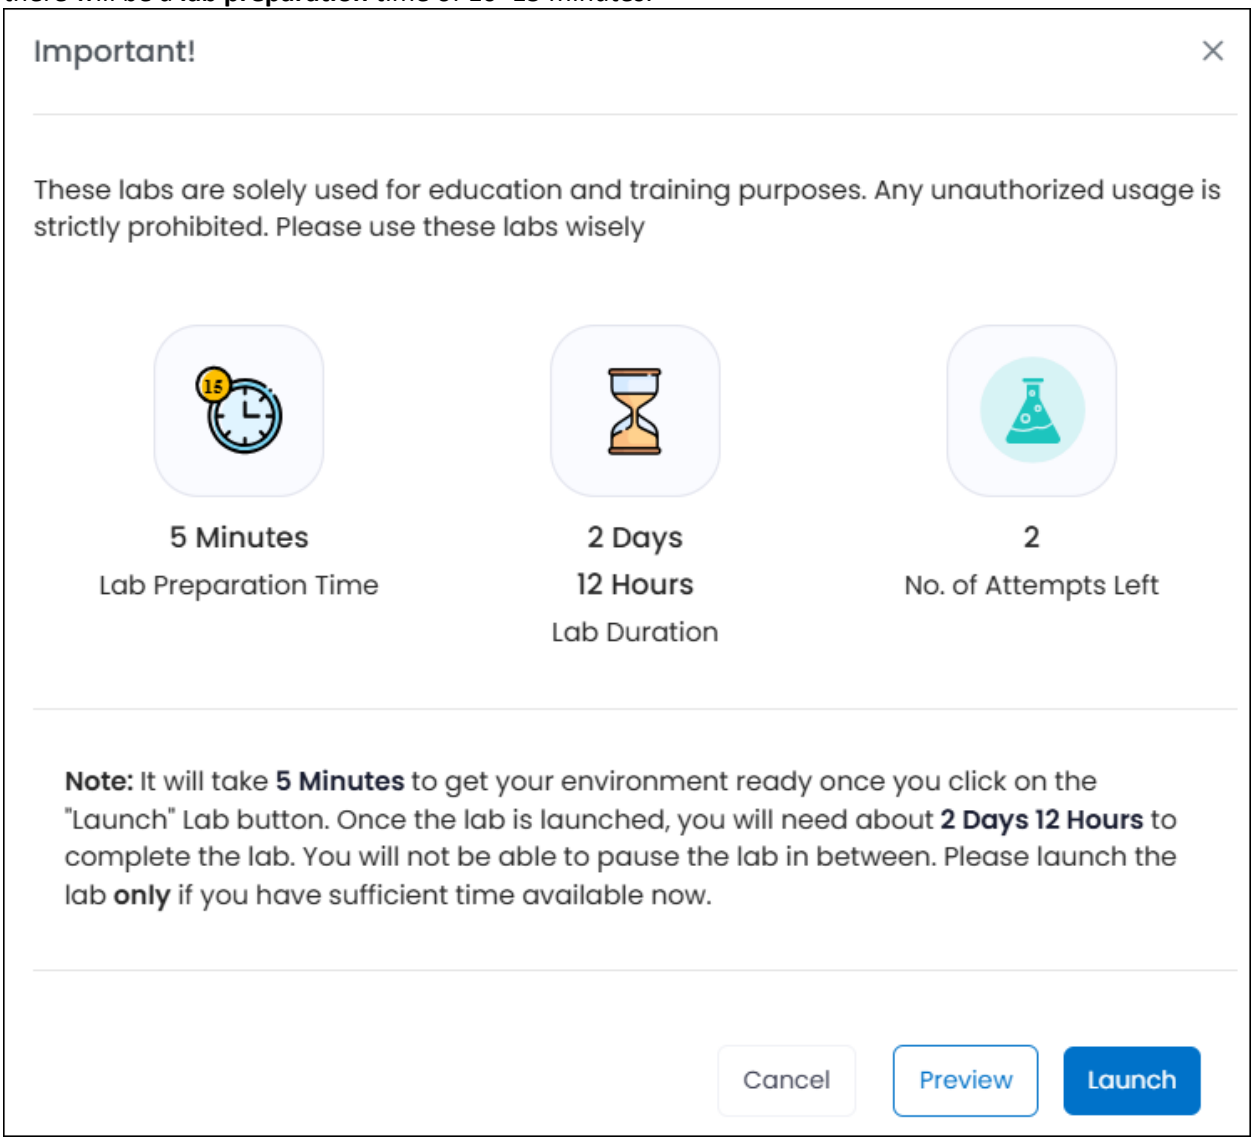

17. The course contains 1 **Lab.** For each project, you would get 2 attempts only.

18. Click on **Launch** for the respective lab that you want to activate. Please note that one attempt will be used each time you click on Launch.

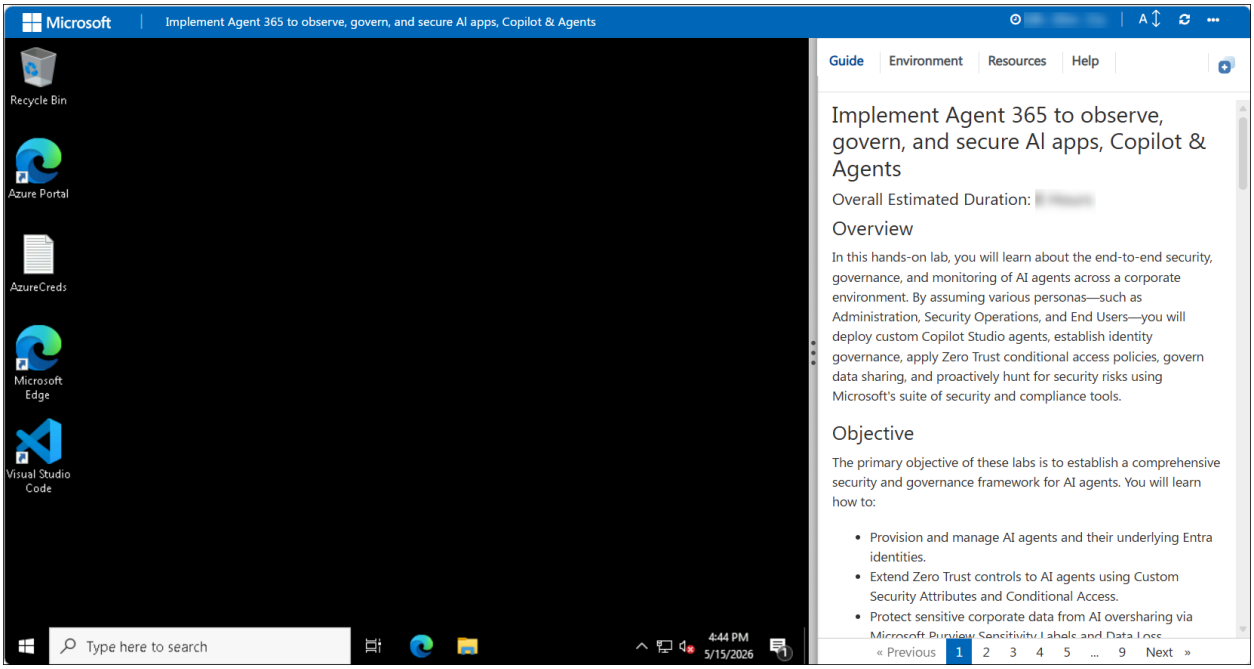

19. Go through the prompt message before launching the lab. Please note that during the event, there will be a **lab preparation** time of 10–15 minutes.

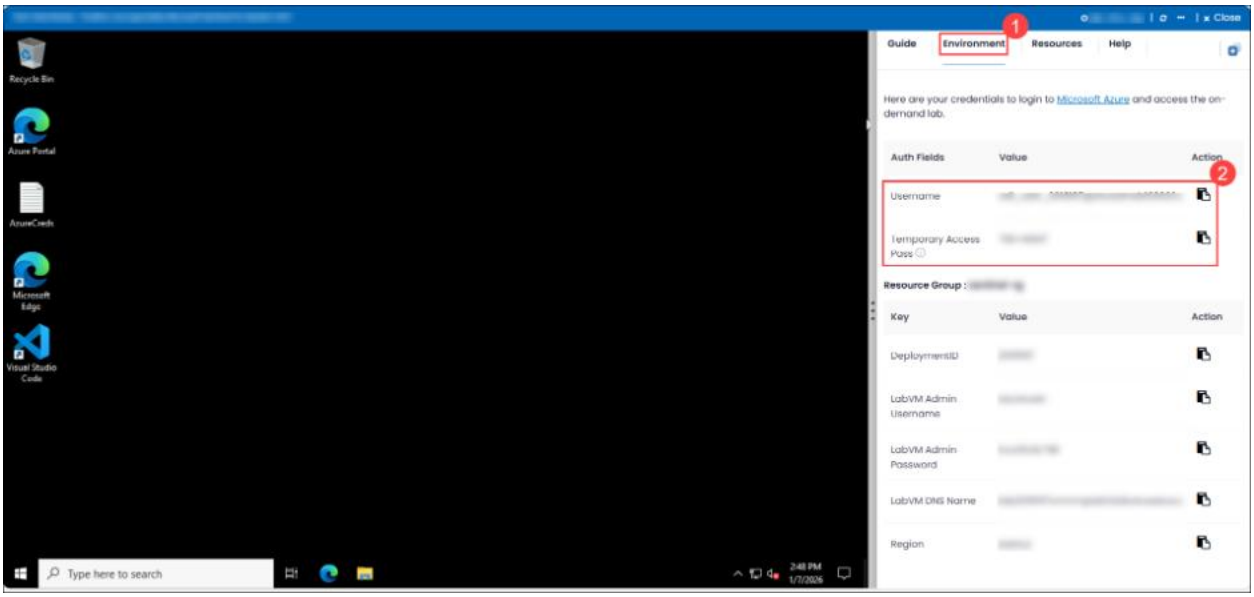

20. Please wait and allow the lab deployment to be completed. If the deployment takes longer than 10 minutes, reach out to Support at cloudlabs-support@spektrasystems.com.

21. Upon launching your lab environment, a virtual machine will appear on the left, and the lab guide will appear on the right. Throughout the lab, **follow the instructions** provided in the lab guide.

The lab will be active for 60 **hours** from the time of launch. Please complete the lab within this duration, as the lab environment will be automatically deleted once the time expires. Throughout the lab, follow the instructions provided in the lab guide.

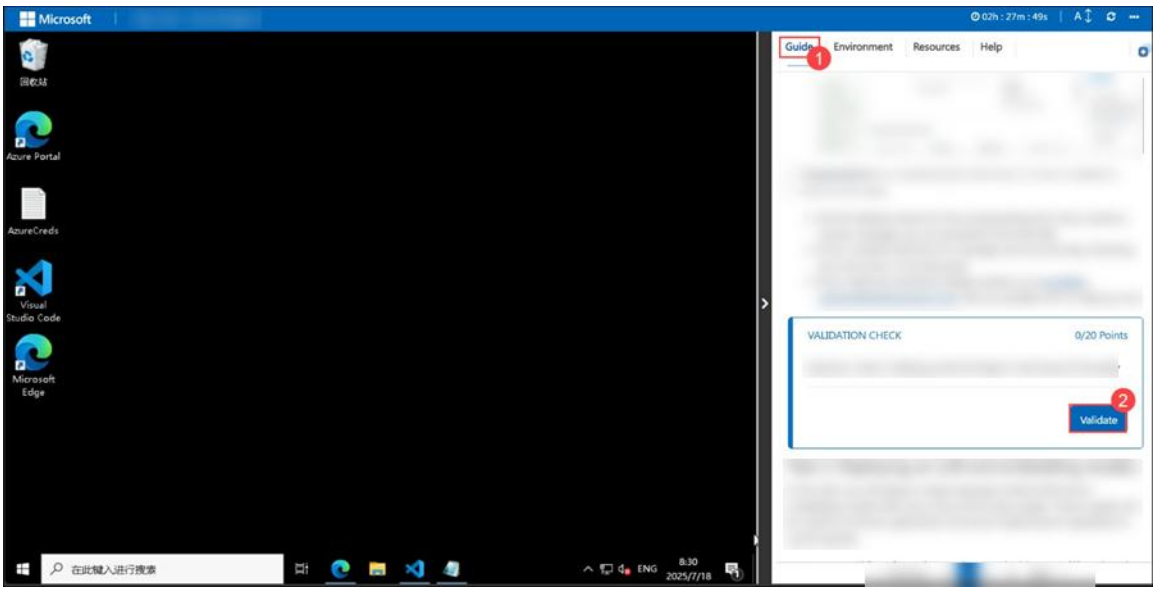

22. Select the **Environment (1)** tab. Login to the Azure portal using the **Username** and **Temporary Access Pass (2)** provided in the **Environment** tab.

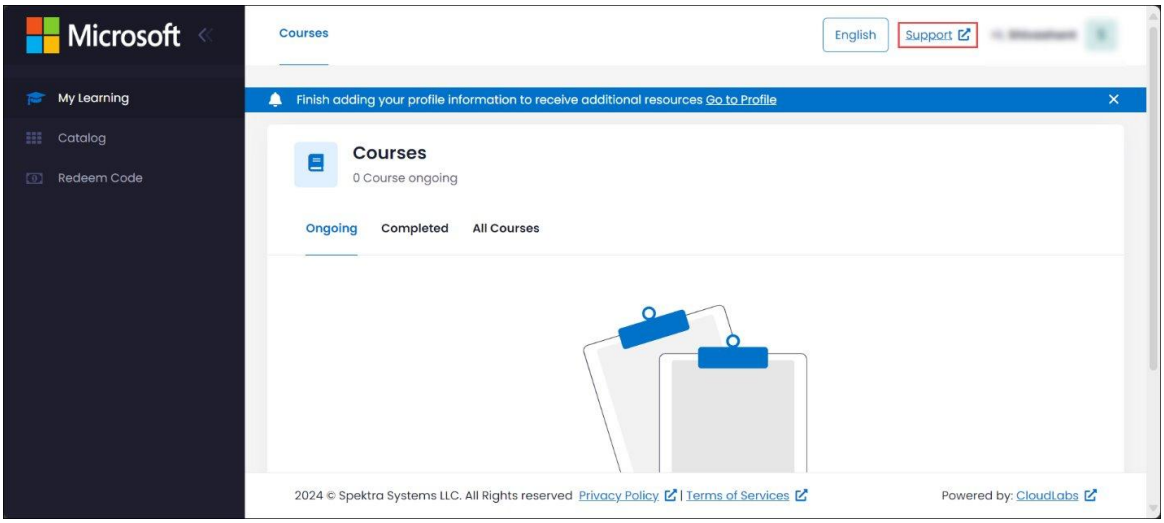

23. While following the instructions, you will come across validation steps to confirm the actions you've performed.

    Please click the **Validate** (2) button in the **Guide** (1) at each indicated point. If the validation is successful, proceed to the next step. If it fails, review what may have been missed, correct it, and try validating again.

    Note: Validations are mandatory, as each successful validation contributes to your overall score for this lab.

24. Click on the **Support icon** after signing in successfully for any concerns or queries. Contact **Support** in case of additional queries or concerns.

FAQs

Q: Can I access the CloudLabs portal from any device?

A: Yes, you can access the CloudLabs portal from any device with an internet connection and a web browser.

Q: What happens if the lab deployment time takes longer than expected?

A: If the deployment time is taking longer than expected, please reach out to Support for assistance.

Q: What should I do if I face technical issues during the workshop?

A: If you encounter any technical issues during the workshop, please **contact your instructor immediately** for assistance.

Q: Can I extend my lab's environmental access?

A: Lab environments are provided for a fixed **24-hours window per take**. Extensions are **not typically allowed**. However, if you experience **technical issues** that impact your ability to complete the lab, a limited extension **may be granted as a one-time exception** based on the issue of justification.

Q: How can I access my lab environment the next day?

A: You can navigate back to the same course and access and launch the next day's lab as per the schedule.

Q: What should I do if I have questions or problems?

A: You can reach out to CloudLabs Support for additional resources and assistance.

Quick Tips

Copy-Paste Issue:

If copy-paste doesn't work from the lab guide to the Virtual Machine (VM), please try the workaround given on the URL below.

- Copy Paste | CloudLabs Documentation

RDP over HTTP Issue:

In case RDP over HTTP is not working, and you are not able to access the virtual machine, please refer to the URL below.

- RDP: Known Functionality Issues | CloudLabs Documentation

Add Safe Sender:

Intermittently, emails sent from CloudLabs Support are received in junk/spam folders. Please refer to the URL below on how to resolve this issue.

- Add Safe Sender | CloudLabs Documentation
